The Saemaul Undong movement was a community-driven development program of the Republic of Korea in the 1970s. The movement contributed to improved community well-being in rural communities through agricultural production, household income, village life, communal empowerment and regeneration, and women's participation. This report examines the strengths and weaknesses of the movement along with contributing factors, including institutional arrangements, leadership influence, gender consideration, ideological guidance, and financing. It also reviews existing studies and government data on the movement, and presents excerpts from interviews with key persons engaged in the movement and useful lessons for implementing community-driven development initiatives in developing countries.

**Premodern Chinese described a great variety of the peoples they encountered as "black." The earliest and most frequent of these encounters were with their Southeast Asian neighbors, specifically the Malaysians. But by the midimperial times of the seventh through seventeenth centuries C.E., exposure to peoples from Africa, chiefly slaves arriving from the area of modern Somalia, Kenya, and Tanzania, gradually displaced the original Asian "blacks" in Chinese consciousness. In *The Blacks of Premodern China*, Don J. Wyatt presents the previously unexamined story of the earliest Chinese encounters with this succession of peoples they have historically regarded as black. A series of maritime expeditions along the East African coastline during the early fifteenth century is by far the best known and most documented episode in the story of China's premodern interaction with African blacks. Just as their Western contemporaries had, the Chinese aboard the**

**ships that made landfall in Africa encountered peoples whom they frequently classified as savages. Yet their perceptions of the blacks they met there differed markedly from those of earlier observers at home in that there was little choice but to regard the peoples encountered as free. The premodern saga of dealings between Chinese and blacks concludes with the arrival in China of Portuguese and Spanish traders and Italian clerics with their black slaves in tow. In Chinese writings of the time, the presence of the slaves of the Europeans becomes known only through sketchy mentions of black bondservants. Nevertheless, Wyatt argues that the story of these late premodern blacks, laboring anonymously in China under their European masters, is but a more familiar extension of the previously untold story of their ancestors who toiled in Chinese servitude perhaps in excess of a millennium earlier.**

Part IV, "Compliance," examines the most critical processes for the prevention and detection of money laundering and terrorist financing. This section reflects on the practical elements that should be in place so that financial institutions can comply with AML/CTF requirements; these are categorized into the development and implementation of internal controls, policies and procedures. ***The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.***

## ***U.S. Tax Treaties***

This guide provides a practical, basic introduction to the tax consequences of transferring executives and specialists from one country to another.

It is 1863, but not the one it should be. Time has veered wildly off course, and now the first moves are being made that will lead to a devastating world war and the fall of the British Empire. Caught in a tangled web of cause, effect, and inevitability, little does Burton realize that the stakes are far higher than even he suspects. A final confrontation comes in the mist-shrouded Mountains of the Moon, in war-torn Africa of 1914, and in Green Park, London, where, in the year 1840, Burton must face the man responsible for altering time: Spring Heeled Jack! Burton and Swinburne's third adventure is filled with eccentric steam-driven technology, grotesque characters, and bizarre events, completing the three-volume story arc begun in *The Strange Affair of Spring Heeled Jack* and *The Curious Case of the Clockwork Man*. From the Trade Paperback edition.

Eleven-year-old Charlie Spruit can't believe his luck when he opens his door to an alien one morning. Who is he? Why has he come? 'Eeek, ' as Charlie decides to call him, takes up secret residence in Charlie's bedroom where he sleeps on the ceiling by night and pores over Charlie's football magazines and stickers by day. **Malaria remains an important cause of illness and death in children and adults in countries in which it is**

**endemic. Malaria control requires an integrated approach including prevention (primarily vector control) and prompt treatment with effective antimalarial agents. Malaria case management consisting of prompt diagnosis and effective treatment remains a vital component of malaria control and elimination strategies. Since the publication of the first edition of the Guidelines for the treatment of malaria in 2006 and the second edition in 2010 all countries in which *P. falciparum* malaria is endemic have progressively updated their treatment policy from use of ineffective monotherapy to the currently recommended artemisinin-based combination therapies (ACT). This has contributed substantially to current reductions in global morbidity and mortality from malaria. Unfortunately resistance to artemisinins has arisen recently in *P. falciparum* in South-East Asia which threatens these gains. This third edition of the WHO Guidelines for the treatment of malaria contains updated recommendations based on a firmer evidence base for most antimalarial drugs and in addition include recommendation on the use of drugs to prevent malaria in groups at high risk. The Guidelines provide a framework for designing specific detailed national treatment protocols taking into account local patterns of resistance to antimalarial drugs and health service capacity. It provides recommendations on treatment of uncomplicated and severe malaria in all age groups all endemic areas in special populations**

**and several complex situations. In addition on the use of antimalarial drugs as preventive therapy in healthy people living in malaria-endemic areas who are high risk in order to reduce morbidity and mortality from malaria. The Guidelines are designed primarily for policy-makers in ministries of health who formulate country-specific treatment guidelines. Other groups that may find them useful include health professionals and public health and policy specialists that are partners in health or malaria control and the pharmaceutical industry. The treatment recommendations in the main document are brief; for those who wish to study the evidence base in more detail a series of annexes is provided with references to the appropriate sections of the main document.**
