*This pocket manual provides a selective survey of available engineering for the product range of LOI Thermoprocess GmbH. Furthermore, important information material based on specialized literature is summarized. The pocket manual primarily focuses on engineering aspects. Information on process technology is limited to topics which concern all or most of all plant equipment (furnaces) in order not to exceed the pocket manual concept. Data is mainly provided numerically in tables in order to simplify direct calculable utilization. Diagrams are only used if they improve illustration or to feature the plant equipment (furnace) based origin of the*
