

Westlaw Research Guide

Legal research has changed dramatically in the past 20 years, first with the development of electronic legal research using Lexis and Westlaw and then with the introduction of the internet which has forever changed the traditional manual approach to legal research into a hybrid of both manual and electronic legal research. Drawing from nearly 50 years of combined teaching experience the authors have compiled this unique and valuable work with an approach that differs from most other methods of legal research instruction. In it they have reversed the typical instruction model into a question & answer model that will greatly benefit a large cross-section of researchers from a multitude of disciplines. In a simple-to-use, efficient reference guide this work provides answers to basic legal research questions as well as definitions of many legal terms. It also delves into the use of online and manual resources to locate answers to more complex questions. Students, librarians, attorneys, paralegals, business professionals, and the general public will truly benefit from this handy reference work.

Concise Guide to Legal Research and Writing

Internet Legal Research on a Budget

The purpose of this research guide is to introduce the researcher, whether an attorney, scholar, law student, or information specialist researching in this field, to the primary and secondary resources available on environmental law, in print and online. Specifically, this guide will explore state and federal sources of primary law including the statutes, regulations, case law, and agency decisions. Finding tools such as Digests as well as citators designed to ensure the accuracy of sources will also be discussed. This book will cover most of the numerous secondary sources available because of the complexity of environmental law, particularly its regulatory structure at the federal level. These sources include books, legal encyclopedias, treatises, practice guides, dictionaries, law journals/periodicals, and news/current awareness sources. Online research is also important in the area of environmental law. It includes electronic subscription databases with comprehensive legal research platforms such as Westlaw, Lexis Advance, and Bloomberg Law, as well as the more specialized databases such as the Environment and Energy Daily online publications. Free internet sites, such as government agency websites, provide a wealth of information and documents beyond what is available through the commercial databases.--Publisher.

"Legal Research Using WESTLAW" is an invaluable guide for anyone conducting legal research with

WESTLAW, a popular research vehicle. The book provides instruction in a step-by-step manner and highlights all of the intricacies of WESTLAW. It is fully illustrated for easy reference and offers tutorials that enhance understanding of the material. The-end-of chapter exercises present problems that are similar to those found in real law offices.

Westlaw Research Guide

The third edition of California Legal Research continues to fill a unique niche in the literature available for California state law research, explaining both the sources of California law and the process of conducting research using those sources. After introductory chapters devoted to the basic research process and research techniques, California Legal Research explores judicial opinions, the state constitution, statutes and legislative history, and administrative law. The book then turns to updating research with Shepard's and KeyCite, using secondary sources and practice guides, and planning a research strategy. A final chapter explains legal citation, with information on the California Style Manual, the ALWD Citation Manual, and the Bluebook. The book should be

valuable to a wide range of audiences, from first-year students to seasoned veterans. Outlines of the research process and excerpts from key state sources make the book easy to use. The text includes brief discussions of legal analysis throughout, recognizing the interplay between research and analysis. California Legal Research supplements its detailed discussion of state research with brief discussions of federal research. Thus, it can be used as the sole text in a research course or in conjunction with texts focusing on topical or federal research.

Featuring Deborah E. Bouchoux's highly regarded assignments, examples, and building-block approach, *Concise Guide to Legal Research and Writing, Fourth Edition* continues to provide timely coverage of the essential research and writing skills used by today's paralegals. Designed specifically for paralegal students, this is the ideal text for shorter legal research and writing courses. New to the Fourth Edition: New "Sidebar" feature in all research chapters provides quick tips showing how the material in that chapter applies to computer-assisted legal research systems, such as Lexis, Westlaw, and Bloomberg Law. Discussion of GovInfo, which provides free public access to official and authenticated publications from all three branches of the federal government. Coverage of new tools used for cite-checking, including EVA and Bestlaw. Discussion of Westlaw Edge, Westlaw's new research

platform. Extensive new coverage of the increasing use of artificial intelligence in legal research and writing. Discussion of new sources that provide free public access to the law, including Harvard's Caselaw Access Project, CourtListener, and RECAP Project. New sections on preparing email letters and email memoranda, including assignments. All new Research Questions and Internet Legal Research Assignments have been included for each chapter. Professors and students will benefit from: Concise, well-organized text, divided into six main sections: Section I discusses primary authorities Section II covers secondary sources Section III focuses on computer-assisted legal research using Lexis Advance, Westlaw, and the Internet Section IV covers citation form and how to ensure that these sources are still "good law" Section V provides an overview of the legal research process Section VI covers legal writing Pedagogy designed to enhance the accessibility of the material, including helpful charts and diagrams that synthesize complex topics, updated Practice Tips offering realistic and helpful suggestions for workplace success, and Ethics Alerts in every chapter. Targeted and ample exercises help students learn how to use a wide range of research sources. Tips on how to effectively use electronic resources are included throughout the text. Conscientious revision ensures that the book has the most up-to-date material, presented in a readable
