This book gives the reader a straightforward and continuous survey of the history of the French Foreign Legion. By outlining the Legion's vicissitudes, victorious campaigns, epic marches, heroic and sometimes hopeless stands, dirtiest combats and dramatic defeats, but also by briefly placing the Legion back in the historical background of France, and by describing its development, organization, uniforms, equipments and weapons, the author hopes to dispel myths, and try to give a true and accurate picture of what the French Foreign Legion has been from 1831 until today. There are well-researched, detailed line drawings throughout.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

A.J. Liebling's classic New Yorker pieces on the "sweet science of bruising" bring vividly to life the boxing world as it once was. It depicts the great events of boxing's American heyday: Sugar Ray Robinson's dramatic comeback, Rocky Marciano's rise to prominence, Joe Louis's unfortunate decline. Liebling never fails to find the human story behind the fight, and he evokes the atmosphere in the arena as distinctly as he does the goings-on in the ring—a combination that prompted Sports Illustrated to name The Sweet Science the best American sports book of all time.

'A brilliant and important book ... Five Stars!' Mark Dolan, talkRADIO 'An important new book' Daily Express An alternative history of the world that exposes some of the biggest lies ever told and how they've been used over time. Lincoln did not believe all men were created equal. The Aztecs were not slaughtered by the Spanish Conquistadors. And Churchill was not the man that people love to remember. In this fascinating new book, journalist and author Otto English takes ten great lies from history and shows how our present continues to be manipulated by the fabrications of the past. He looks at how so much of what we take to be historical fact is, in fact, fiction. From the myths of WW2 to the adventures of Columbus, and from the self-serving legends of 'great men' to the origins of curry – fake history is everywhere and used ever more to impact our modern world. Setting out to redress the balance, English tears apart the lies propagated by politicians and think tanks, the grand narratives spun by populists and the media, the stories on your friend's Facebook feed and the tales you were told in childhood. And, in doing so, reclaims the truth from those who have perverted it. Fake History exposes everything you weren't told in school and why you weren't taught it.
