This instruction book on how to live and actually enjoy life guides the millennial generation young adults in what to do now that they are out of college and living in the real world. It addresses such topics as avoiding debt, mastering job interviews, changing a tire, staying in shape, and maintaining a home. This family planning and survival guide provides comprehensive information on every type of natural disaster, as well as many man-made and technological emergencies. Also includes sources for additional information.

Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller Outliers, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller David and Goliath, Malcolm Gladwell has written a gripping guidebook for troubled times.

Electromagnetic fields and radiation are everywhere - near power lines, computers, radio and television signals, microwave ovens, toasters, alarm clocks and everyday electrical appliances. The media are warning of the possible hazards of EMFs and EMR and recent studies suggest that they cause leukaemia in children and breast and brain cancer in adults. This book gives facts about the dangers, revealing that most of us are exposed to radiation and electromagnetic fields everyday. It advises which levels to worry about, and how to minimize the risks. It is also a sourcebook for citizens seeking action from utility companies, employers, manufacturers and governmental agencies.

Do you know how to properly conduct yourself in a public restroom? What about while in the midst of a profoundly awkward silence? Have you perfected how to get out of helping your friend move? If you answered no to those questions, fear not. You need Stuff You Should Know About Stuff, the book that future anthropologists will no doubt call "the Rosetta Stone of handling trivial life situations." From the sketch comedy duo who created the viral videos "Sh't Nobody Says" and "Things You Can't Do When You're Not in a Pool," Tripp and Tyler bring you the written word in Stuff You Should Know About Stuff, a guide instructing you how to navigate the treacherous waters of life's odd quandaries. There are even photos and illustrations for people who enjoy photos and illustrations and stuff like that. You can read it from cover to cover or you can choose to educate yourself only in conjunction with your bowel movements. Totally your call there. Stuff You Should Know About Stuff places the priority on the trivial experiences of life, because that's where we spend most of our time; trying to recover from going for the fist bump when a casual acquaintance wanted a high five.

Now in its second edition, here is one of the first and only issue-based nonpartisan guides to contemporary American politics. It's a very exciting time in American politics. Voter turnout in primaries and caucuses across the nation has shattered old records. More than ever, in this election year people are paying attention to the issues. But in a world of sound bites and deliberate misinformation and a political scene that is literally colored by a partisan divide—blue vs. red—how does the average educated American find a reliable source that's free of political spin? What You Should Know About Politics . . . But Don't breaks it all down, issue by issue, explaining who stands for what, and why, whether it's the economy, the war in Iraq, health care, oil and renewable energy sources, or climate change. If you're a Democrat, a Republican, or somewhere in between, it's the perfect book to brush up on a single topic or read through to get a deeper understanding of the often mucky world of American politics.

A hilarious illustrated collection of tips for successfully navigating the dating world as a millennial. For single millennials, this situation is all too familiar: You're on a date. It's going well! Then suddenly your date looks at you like you're a f*cking idiot and you never hear from that person again. Guess you're going to die alone, right? Maybe not! Humble authors Ben Schwartz and Laura Moses have written a book to save the future of the human race: Things You Should Already Know About Dating, You F*cking Idiot, a collection of 100 dating tips--complete with illustrations--that teaches clueless guys and girls the dos and don'ts of dating. In their book, Ben and Laura cover all the basics, from "Why are you texting in just Emojis, dummy?!" to "Stop playing games, idiot!" and, of course, "PUT YOUR PHONE DOWN, A**HOLE!" Simply put, this book will make you laugh and finally give you a fighting chance at not dying alone.

If something were to happen to you today or tomorrow, does your family know everything that there is to know about you? Would they know about your health insurance? Or if you have life insurance? Who is responsible for letting your job know what happened? Even if you know all of the answers to these questions, what about the people that are closest to you... do they know? Who will tell the rest of your friends and your family? Most people keep all of their important numbers on their phones and they are the only person who knows the pin or password! Did you know that these are just some of the questions that six out of every ten families struggle to answer every day when faced with a loved one's long-term illness, such as cancer, a disability, from a stroke, heart attack, or an accident, or even, your death? Some parents leave more information for a babysitter on a date night, in the case of an emergency, than some people will tell their families about their final wishes! That's why no matter how much you have, whether you are single or married, whether you have children, grandchildren, or just a cat or a dog, if you own a home or are just renting an apartment, you owe it to your friends and family to decide right now what should happen to everything that you have worked so hard for, and more importantly, what happens to you in the event of your long-term illness, disability, or, even your death. Without it, did you know that, ultimately, a judge, who doesn't know you or the people that you love, will decide who gets, or doesn't get, what, and what ultimately happens to you? Don't let that happen! Protect your peace of mind, and more importantly, the people you love with the one thing that thousands of people every day only wish that someone gave them years ago. It is called "What You Should Know Right Now. . . My Final Wishes and Other Important Information in The Event of My Long-Term Illness, Disability, or Death." "What You Should Know Right Now" is designed to help you to organize your thoughts, gather necessary information, and to be able to share that information with your family if and when you can no longer speak for yourself. Important information like... - Who to call and what you need to do right away - Vital information about you, including other family histories. - How to locate important medical information. - How to properly care for your children, and/or your pets. - What bills to pay and services to stop or transfer. - Information about your job and other sources of income. - Information about your insurance, banking, and mortgage. - Important legal information and so much more. More importantly, only in "What You Should Know Right Now" will you also discovered the one move that every parent should have made, by now, to protect their children's future. Most people still don't know! Maybe that is why "What You Should Know Right Now" is now the number one essential planning guide that every adult needs, especially as you are growing older, if you are a single parent, if you are ill, are a caretaker, preparing for major surgery, and/or a frequent traveler. If you have an aging parent or other older relatives, help them to complete it. It is guaranteed to give them the chance to be remembered how they want to be remembered. In the event of your death, it will provide your family with everything that they will need to know to celebrate your life, right down to the songs that you would like played at your funeral and who you would like to be there. This is important information that could easily be forgotten or overlooked. Best of all, it will now be all in one convenient location, when they need it the most. Don't leave your family with questions that only you can answer! Order a copy for you and someone you love right now!

Harry Collins and Trevor Pinch liken science to the Golem, a creature from Jewish mythology, powerful yet potentially dangerous, a gentle, helpful creature that may yet run amok at any moment. Through a series of intriguing case studies the authors debunk the traditional view that science is the straightforward result of competent theorisation, observation and experimentation. The very well-received first edition generated much debate, reflected in a substantial new Afterword in this second edition, which seeks to place the book in what have become

From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they've long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there's something interesting about everything (...except maybe jackhammers).
