Discover #1 New York Times bestselling author David Bach's three secrets to financial freedom in an engaging story that will show you that you are richer than you think. Drawing on the author's experiences teaching millions of people around the world to live a rich life, this fast, easy listen reveals how anyone—from millennials to baby boomers—can still make his or her dreams come true. In this compelling, heartwarming parable, Bach and his bestselling coauthor John David Mann (*The Go-Giver*) tell the story of Zoey, a twenty-something woman living and working in New York City. Like many young professionals, Zoey is struggling to make ends meet under a growing burden of credit card and student loan debt, working crazy hours at her dream job but still not earning enough to provide a comfortable financial cushion. At her boss's suggestion, she makes friends with Henry, the elderly barista at her favorite Brooklyn coffee shop. Henry soon reveals his "Three Secrets to Financial Freedom," ideas Zoey dismisses at first but whose true power she ultimately comes to appreciate. Over the course of a single week, Zoey discovers that she already earns enough to secure her financial future and realize her truest dreams—all she has to do is make a few easy shifts in her everyday routine. *The Latte Factor* demystifies the secrets to achieving financial freedom, inspiring you to realize that it's never too late to reach for your dreams. By following the simple, proven path that Henry shows Zoey, anyone can make small changes today that will have big impact for a lifetime, proving once again that "David Bach is the financial expert to listen to when you're intimidated by your finances" (Tony Robbins, #1 New York Times bestselling author of *Money: Master the Game*). Across intellectual disciplines, the ontological turn is restructuring how we think about our relationships with the natural world. Influenced by the seemingly disparate realms of indigenous philosophy and quantum physics, the turn invites us to think about intra-actions and assemblages of human and nonhuman entities. This raises epistemological questions about how we know about the world, and spotlights some of the problems with how we currently do conventional social science research. *Diffractional Ethnography* invites social scientists to consider alternate methodologies that account for the complexity of human behavior situated in larger environmental contexts. For both novice and experienced researchers,

**Facing History and Ourselves has developed Teaching Reporter to help classrooms explore essential questions about being a global citizen in the information age. The documentary Reporter follows New York Times columnist Nicholas Kristof on a reporting trip to central Africa. Watching Kristof identify stories that he thinks will galvanize readers to take action to prevent further humanitarian disasters in places such as Congo and Darfur, gives us an opportunity to think about not only the role of the journalist, but also our own roles as members of a global society. To whom do we show compassion? Under what circumstances? How can information be used to encourage action on behalf of others? Teaching Reporter includes materials that help students make connections between the dramatic events presented in the film and the choices they make in their own lives as creators and consumers of media. By addressing issues ranging from journalistic objectivity to psychic numbing, the resources in this study guide help develop students' civic and media literacy skills. Once Upon a Time, Storytelling Met Instructional Design From children to adults, everybody likes a good story. Stories are memorable, actionable, and emotional. We are constantly making sense of the world by forming stories, and that makes them perfect for instructional design. Instructional Story Design is a practical guide to writing and developing stories for training. It takes what you already know about a story's power to connect with people and offers a clear methodology for the otherwise daunting process of creating a compelling story. Master story designer Rance Greene shares his powerful yet familiar process to discover, design, and deliver instructional stories. He presents the two essential elements that must be present to tell a story for training: relatable characters and strong conflict. These elements create a desire for resolution and grab learners' attention. This book offers advice for unearthing the root of the performance problem, creating action lists for learners, and convincing stakeholders about the effectiveness of stories. Case studies from household companies such as Pizza Hut, Southwest Airlines, and PepsiCo show story design in action. Job aids and resources include an audience profile questionnaire, character description worksheet, storyboard template, and tips for developing stories using graphics, audio, and video. With this book, you'll:**

- Sharpen your analysis skills to discover potential training stories.
- Design relatable stories that concretely connect with learning objectives.
- Easily develop captivating stories with tools you already own.
- Plan your next steps to implement your instructional story.

**See how and why Washington is not functioning in Bob Woodward's freshly reported, thirty-five-page Afterword to his national bestseller, The Price of Politics, which provides a detailed, often verbatim account**

of what happened in the dramatic “fiscal cliff” face-off at the end of 2012 between President Obama and the Republicans. Now it’s happening again. In fall 2013, Washington faces a new round of budget and fiscal wars that could derail the American and global economies. “We are primarily a blocking majority,” said Michael Sommers, Speaker John Boehner’s chief of staff, summarizing the House Republican position. It was the land of no-compromise: On health care cuts over ten years, Boehner suggested to Obama, you are \$400 billion, I’m at \$600 billion. “Can we split the difference here? Can we land at \$500 billion?” “Four hundred billion is it,” Obama replied. “I just can’t see how we go any further on that.” After making \$120 billion in other concessions, Obama pleaded with Boehner, “What is it about the politics?” “My guys just aren’t there,” Boehner replied. “We are \$150 billion off, man. I don’t get it. There’s something I don’t get.” **The Price of Politics** chronicles the inside story of how President Obama and the US Congress tried, and failed, to restore the American economy and set it on a course to fiscal stability. Woodward pierces the secretive world of Washington policymaking once again, with a close-up story crafted from meeting notes, documents, working papers, and interviews with key players, including President Obama and House Speaker John Boehner. Woodward lays bare the broken relationship between President Obama and the Congress.

Latest version: May 2010. Careers are shortening and lives are lengthening - how can we keep our careers going as long as we do? In a global market of decreasing product and industry life cycles, and increasing competition, two powerful forces are pulling in opposite directions: the need to extend our careers to fund our growing longevity is set against the aspirations of a bulge of 1960s baby boomers to fill a shrinking number of management positions. This book takes a wry, detached look at the global commercial and demographic forces driving our emerging career patterns, and proposes what we should do now. The Second Edition of **Social Policy and Social Change** is a timely examination of the field, unique in its inclusion of both a historical analysis of problems and policy and an exploration of how capitalism and the market economy have contributed to them. The New Edition of this seminal text examines issues of discrimination, health care, housing, income, and child welfare and considers the policies that strive to improve them. With a focus on how domestic social policies can be transformed to promote social justice for all

groups, Jimenez et al. consider the impact of globalization in the United States while addressing developing concerns now emerging in the global village.

This book offers both marketing and sales professionals a rare combined insight into both worlds to continuously capture customer intelligence and create value, by blending detailed research with academic rigor and commercial experience of the authors in both Europe and North America. It has never been easier to produce great marketing content and sales collateral. And yet, 90% of the content that marketing produces is NEVER used by sales. Why not? Because it's not relevant to the audience or the prospect doesn't even know the content exists. Furthermore 58% of deals end up in "no decision" because Sales has not presented value effectively. Companies are creating lots of noise but failing to resonate with the customers. So what? The danger, aside from marketing wasting tens of millions of dollars on ineffective content and tools, is that customers will disengage. 94% of prospects say they have completely disengaged with vendors because of irrelevant content. In order to grow fast, the authors argue, Sales and Marketing teams need to slow down. They need to work together to truly understand their customers' needs, wants, motivations and pain points so that they can offer customized "value". The book sets out how to establish a formal program to continuously capture customer intelligence and insights – the shiny gems of understanding that help prospects to connect the dots – so that value can be consistently articulated in marketing and sales conversations. By integrating the best ideas and practice from commercial experience and academic research the authors show how to create value across the entire marketing and sales value chain – not only get a new customer, but to continue to create value for future purchases by creating "post-sales" value.

Behind the Numbers provides a comprehensive and unique approach toward numerology through intuition, reflection, and application. The process of compiling information for Behind the Numbers began with a repeating nod from an elusive yet powerful Presence that introduced itself through 11:11. Providing no answers but offering reassurance, the Presence encouraged Todd to search within to discover the answers he believed existed somewhere outside himself. Behind the Numbers chronicles a journey born in the ruins of addiction and spiritual paralysis and rises from the ashes toward redemption through determination and forgiveness. Beginning as a journal documenting the ongoing process of healing and spiritual transformation and concluding as a guide that takes a unique and relevant approach to Numerology, Behind the Numbers offers a unique approach towards Numerology that expands ones understanding of this amazing philosophy. Behind the Numbers takes a unique approach towards numerology by identifying numbers as 'filters' that channel the characteristics of the individual, as well as their Fate and Destiny. Rather than definitive indicators of the individual's limitations or abilities, Behind the Numbers releases such expectations and approaches this ancient philosophy from an entirely new perspective that is accessible as it is profound.

Recent music therapy advances and evidence-based practices have earned respect within the medical sciences and garnered popularity amongst users and practitioners. While integrative medicine treats the whole patient with ayurvedic and allopathic medicine, music therapy provides a safe and effective way of managing stress, pain, unpleasant symptoms, response to illness, and treatment side effects, and has been proven to enhance patients' quality of life and general wellbeing. Exploring the ways in which these methods have been practised throughout history, the author takes readers on a journey from illness to wellness, and shows how this can be guided through music. The book instructs music therapists and other practitioners in the use of specific techniques, providing examples of clinical applications. It includes activities that prepare a music therapist physically, emotionally and musically for this journey with another, and provides case studies to explore the difficulties that might arise.

In Mission-Driven Leadership, Mark Bertolini, the long-time chairman and CEO of Aetna, the Fortune 500 health insurance company, reveals that genuine leadership is not about dollars and market share but about improving lives and communities. Mark Bertolini didn't get to the corner office through traditional means. He grew up in a blue-collar neighborhood in Detroit. Early in his career, he was known for his bare-knuckled leadership and hard driving competitiveness that helped him to turnaround several companies. But his ambition came at a cost as he ran roughshod over his colleagues and employees, and spent time away from his family. Two events served as wakeup calls for the hard-charging Bertolini. First his son Eric was diagnosed with incurable cancer, and Bertolini found himself confronting the healthcare industry firsthand, not as an executive, but as the parent of a deathly ill child, determined to save his son's life. And miraculously, after a year in the hospital, often at death's door--Eric was twice given last rites--his son recovered. The second wakeup call was a skiing accident several

years later in which Bertolini broke his neck. As his life unraveled in the face of years of chronic pain, therapy, and medication, he realized he had to reinvent himself, emotionally, spiritually, and as a leader--or go under. Mission-Driven Leadership speaks to the lessons Bertolini learned about empathy, about helping employees and Aetna's customers take better care of themselves and each other, about the need to "find the divine in me," and the importance of getting out to meet with employees and customers face-to-face in town halls to truly discover their needs and better serve them.

This is THE book you have been waiting for: Cut to the chase, clear, anti-industry money and investing thinking for the educated layperson. For your family, friends, and community. Tom Jacobs and John Del Vecchio, authors of the best-selling book *What's Behind the Numbers?*, have now come out with their next best-seller, *The Rule of 72*. In an era where it is easy to be skeptical with how companies manage their funds, *Beginning with the Rule of 72*, an easy in-your-head plain-as-day way to understand compound interest, Tom and John teach that there is a way to find companies that are actually willing to pay investors to own their stocks. These experienced and highly successful investment experts review the principles of the Rule of 72, explain the best ways to evaluate financial risks, and review the six tests for grading stocks. Tom and John explain the trifecta for how to grow financial armor and protect your money from self-interested company management and the financial services industry. The book also includes interesting facts that you may not already know, plus a compounding calendar on the book's companion website. Regardless of your investment experience or financial management knowledge, this is a must-read for everyone.

Tom Jacobs is lead advisor for the Motley Fool Special Ops, a stock service where he manages a special situations and opportunistic portfolio. He is cofounder of Complete Growth Investor LLC.

Taxpayer compliance is a voluntary activity, and the degree to which the tax system works is affected by taxpayers’ knowledge that it is their moral and legal responsibility to pay their taxes. Taxpayers also recognize that they face a lottery in which not all taxpayer noncompliance will ever be detected. In the United States most individuals comply with the tax law, yet the tax gap has grown significantly over time for individual taxpayers. The US Internal Revenue Service attempts to ensure that the minority of taxpayers who are noncompliant pay their fair share with a variety of enforcement tools and penalties. **The Causes and Consequences of Income Tax Noncompliance** provides a comprehensive summary of the empirical evidence concerning taxpayer noncompliance and presents innovative research with new results on the role of IRS audit and enforcements activities on compliance with federal and state income tax collection. Other issues examined include to what degree taxpayers respond to the threat of civil and criminal

enforcement and the important role of the media on taxpayer compliance. This book offers researchers, students, and tax administrators insight into the allocation of taxpayer compliance enforcement and service resources, and suggests policies that will prevent further increases in the tax gap. The book's aggregate data analysis methods have practical applications not only to taxpayer compliance but also to other forms of economic behavior, such as welfare fraud.

What can Christians learn from one of the most popular TV series of all time? In its first season, LOST averaged 15.5 million viewers per episode. The show features a cast that struggles with the eternal issues of identity, conflict, relationships, and spirituality. Though the show does not have a Christian foundation or theme, there is much believers can learn about social and cultural attitudes and perspectives through its episodes--such as... the selfish bent of human nature the darkness of evil the hunger people have for acceptance and success the realization of our need for God the hope for a positive future Many of the problems and difficulties of everyday life are captured succinctly in LOST--making it a useful "point of reference" for understanding how different people view issues of a spiritual nature. Ankerberg and Burroughs offer practical suggestions for Christians who desire to talk effectively to others about the various themes in the show.

Expectant mothers are virtual magnets for unsolicited advice. Mothers, grandmothers, aunts, sisters, sisters-in-law, new mothers, friends, and even strangers offer what seems to be an endless supply of supposedly authoritative opinions on every aspect of pregnancy: A craving for spicy food denotes a boy. Carrying the baby low denotes a girl. Besides gender predictions, a pregnant woman is also apt to acquire an earful of advice about miscarriage, dietary habits and cravings, hair growth, weight gain, and childbirth. And, of course, everyone wants to touch her belly. In this engaging, humorous, and very informative book, Drs Shawn A Tassone and Kathryn Landherr -- experienced gynaecologists, a husband-and-wife team of physicians, and parents of four children -- explore the most common superstitions and myths surrounding pregnancy. From their combined twenty years of work in a clinic, as well as their own parenting experience, the authors review the

anecdotes and beliefs, from the slightly unusual to the stranger-than-fiction, and compare them with the scientific evidence. Moving through each stage, from the early weeks of pregnancy to delivery, they examine the legends about diet, gender identification, pre-term labour, the umbilical cord, initiating labour, and the size and movement of the foetus. As they detail the scientific perspective on these varied and often amusing beliefs, the authors not only entertain but provide a great deal of practical information, which will ease the fears and anxieties of expectant parents as well as clear up many confusing notions. If you are pregnant, you owe it to yourself to get this book. Better yet, suggest it as the perfect gift to all those well-meaning advice givers.

Police Leadership as Practice applies a leadership-as-practice approach (emphasising leader-employee relationships) to law enforcement. This book provides a progressive and collaborative leadership text for students of law enforcement, as well as insights into leadership dynamics in all organisations for students and researchers of business and management. The police leadership-as-practice perspective provides a holistic understanding of leadership in the police, identifying factors that inhibit and promote learning. It refers to four main components as dynamic and continuously evolving processes: Strategies: social mission and organisation, along with strategies as practice Community: organisational and police culture, identity and belonging, community of practice and competencies Participation: sense-making and discretion; power and politics Activities: learning as practice, change and change management as practice Practical and enriched with case studies, examples and best practice, the textbook is also rigorously research based. Authored by a professor of business and management with specialist knowledge in police leadership, it brings the cutting edge of leadership thinking to the practicalities of policing. It is essential reading for those engaged with policing, leadership roles, and management. The story of the quiet, suburban community of Seaville, California and the hunt for a serial arsonist continues in this the 3rd novel (Volume I) of the Seaville Wildfire Trilogy. ***"Why do I always see the numbers 444 (or 111, 333, etc.) everywhere I go?" is one of the most frequently asked questions that Doreen Virtue receives at her worldwide workshops. In her best-selling book Healing with the Angels, Doreen included a chapter that briefly explained the meanings behind these number sequences, and many people have commented that they carry the book with them everywhere to help them interpret the numbers they see daily. By popular request from Doreen's audience members, Angel Numbers has been created to serve as a pocket guide containing the angelic meanings of numbers from 0 to 999. Designed to fit into a purse or pocket for easy transport, Angel Numbers provides an interpretation of more complex number sequences than was previously available in Healing with the Angels. This new book focuses on numbers such as 123, 337, 885, and so on. Whether you're seeing these numbers on license plates, telephone numbers, the clock, or other locations, they're very real messages from the angels. Angel Numbers will help you instantly understand the meaning of these signs!***

***A decade ago, computer scientist Douglas Hofstadter coined the term innumeracy, which aptly described the widespread ailment of poor quantitative thinking in American society. So, in What the Numbers Say, Derrick Niederman and David Boyum present clear and comprehensible methods to help us process and calculate our way through the world of "data smog" that we live in. Avoiding abstruse formulations and equations, Niederman and Boyum anchor their presentations in the real world by covering a particular quantitative idea in relation to a context-like probability in the stock market or interest-rate percentages. And while this information is useful toward helping us to be more financially adept, What the Numbers Say is not merely about money. We learn why there were such dramatic polling swings in the 2000 U.S. presidential election and why the system of scoring for women's figure skating was so controversial in the 2002 Winter Olympics, showing us that good quantitative thinking skills are not only practical but fun.***

***Interpret the messages from your spirit guide and discover what your angel numbers are trying to tell you in this enlightening, informative guide to numerology. You pull into your driveway and your clock reads 11:11 exactly; your favorite song runs three minutes and thirty-three seconds; on your drive to work, you are following a car whose license plate number ends in 1234. Are all these number coincidences or do they mean something more? In this book, you will find the meaning behind these "angel numbers" and discover what the universe and your spirit guides are trying to tell you. *Most of us today would agree that the children of this new millennium are growing up in a world that is filled with pitfalls and treacherous paths that previous generations have not had to negotiate. How do we prepare these children to not only survive these paths but be victorious? Father, former youth pastor, and now church pastor, Kevin Brown shares the vision he has been given for teaching about and expecting from our children an involved, disciplined way of life. He believes "The Christian faith depends upon the transfer of the gospel from one generation to the next." Rite of Passage in the Home and Church describes, not a "program," but instead a family's commitment to making a change in priorities that will impact them for generations to come. Pastor Kevin says, "The family has been fractured and splintered by the culture and this segregation of family by age has been brought to the church." At his home church, the family worships together. There is no children's church, no youth services...just the family of God worshipping together as indicated in Scripture. Kevin believes the only hope for our culture is the church and the only hope for the church is the restoration of the family.*

*The companion to the hit CBS crime series Numb3rs presents the fascinating way mathematics is used to fight real-life crime Using the popular CBS prime-time TV crime series Numb3rs as a springboard, Keith Devlin (known to millions of NPR listeners as the Math Guy on NPR's Weekend Edition with Scott Simon) and Gary Lorden (the principal math advisor to Numb3rs) explain real-life mathematical techniques used by the FBI and other law enforcement agencies to catch and convict criminals. From forensics to counterterrorism, the Riemann hypothesis to image enhancement, solving murders to beating casinos, Devlin and Lorden present compelling cases that illustrate how advanced mathematics can be used in state-of-the-art criminal investigations.*
