

Who Was Jacques Cousteau

Series: The ocean world of Jacques Cousteau.

Describes life in, on, and beside the river and the human stories of the region.

Looks at three of the most remarkable and enigmatic creatures of the sea--dolphins, sharks and whales

Are human beings about to return to the sea as some mammals did a few million years ago to become seals, porpoises, and whales? In the absence of drastic anatomical and physiological mutations, it is very improbable indeed. However, in his own way, which is an artificial way, man is preparing his re-entry into the sea.

The Ocean World of Jacques Cousteau

Man of the Oceans

Conserving Underwater Worlds

My Father, the Captain

A noted ocean explorer describes his underwater archeological finds, his diving expeditions, and an invention called a Diving Saucer

Two young explorers join Fabien Cousteau and his team to get up close and personal with great white sharks in this start to a series of graphic adventure novels. Junior explorers Bella and Marcus join famed explorer Fabien Cousteau and his research team as they embark on an ocean journey off the coast of South Africa, where the world’s largest concentrations of great white sharks are found. Their mission is to investigate a sighting of a massive white shark, and tag it so they can track and protect it. Along the way, they’ll encounter whales, seals, dolphins, penguins, and a colorful array of other marine life. They’ll also enter a shark cage and come face to face with these powerful creatures. Dramatic, graphic illustrations and a compelling story help young readers discover tons of facts about sharks and other marine creatures. Children will also learn the many damaging myths about sharks, why they are so misunderstood, and what is being done to protect them from further exploitation and possible extinction.

Examines the life and accomplishments of the French oceanographer, and describes his work studying and filming the undersea world.

Who Was Jacques Cousteau?Penguin

This title introduces readers to Jacques Cousteau, the great explorer who introduced millions of people to the undersea world from his ship the Calypso. Cousteau’s life story is examined from his childhood to his marriage and his education at the French Naval Academy and his service in the French Navy and World War II. Cousteau’s collaboration with engineer Emile Gagnan is included, including their invention of the Self-Contained Underwater Breathing Apparatus or SCUBA system, as is his invention of the underwater camera. Cousteau’s film work is examined, including his Academy Award-winning films The Silent World (1956) and World Without Sun (1964), as is his famous series The Undersea World of Jacques Cousteau. Aligned to Common Core Standards and correlated to state standards. ABDO & Daughters is an imprint of ABDO Publishing Company.

Why does water always take a winding course in streams and rivers? Do common principles and rhythms underlie its movement – whether it be in the sea, in a plant, or even in the blood of a human being? In this seminal and thought-provoking work, the laws apparent in the subtle patterns of water in movement are shown to be the same as those perceptible in the shaping of bones, muscles and a myriad of other forms in nature. Fully illustrated, Sensitive Chaos reveals the unifying forces that underlie all living things. The author observes and explains such phenomena as the flight of birds, the formation of internal organs such as the heart, eye and ear, as well as mountain ranges and river deltas, weather and space patterns, and even the formation of the human embryo.

A colorfully illustrated biography of a little French boy who would become an internationally known oceanographer and champion of the seas. Once upon a time in France, a baby was born under the summer sun. His parents named him Jacques. As he grew, Jacques fell in love with the sea. He dreamed of breathing beneath the waves and swimming as gracefully as a fish. In fact, he longed to become a manfish. Jacques Cousteau grew up to become a champion of the seas and one of the best-known oceanographers in the world. In this lovely biography, poetic text and gorgeous paintings come together to create a portrait of Cousteau that is as magical as it is inspiring. Praise for Manfish “Berne offers a luminous picture-book biography about Jacques Cousteau Puybaret’s smooth-looking acrylic paintings extend the words’ elegant simplicity and beautifully convey the sense of infinite, underwater space.” –Booklist (starred review) “This moving tribute to the great nautical observer and filmmaker is shot through with an authentically childlike sense of adventure and the thrill of discovery This poetic profile of a doer and a dreamer is certain to inspire fresh interest in discovering, and in caring for, our world’s wonders.” –Kirkus Reviews (starred review) “A new generation of children is introduced to the pioneering oceanographer and filmmaker. Beginning with Cousteau’s childhood in France where he marveled at the sea and dreamed of breathing underwater, Berne reveals the unique mix of curiosity, ingenuity, and passion that drove Cousteau to make underwater exploration possible.” –School Library Journal

Three Adventures

Galapagoes, Titicaca, the Blue Holes

Jacques Cousteau's Calypso

Manfish

Discusses marine life and ecology, emphasizing the importance of the oceans to human life and the dangers of overfishing, pollution and mismanagement of the resources of the sea.

A study of Cousteau's specially designed ship "Calypso" details the vessel's technical modifications, and equipment and discusses Cousteau's diverse scientific expeditions and investigations

Born on June 11, 1910, in Saint-Andre-de-Cubzac, France, Jacques Cousteau co-invented the Aqua-Lung, a breathing device for scuba-diving, in 1943. In 1945, he started the French Navy's undersea research group. In 1951, he began going on yearly trips to explore the ocean on the Calypso. Cousteau recorded his trips on the TV series The Undersea World of Jacques Cousteau. In 1996, the Calypso sunk.

Cousteau died on June 25, 1997, in Paris, France.

A biography of Jacques-Yves Cousteau, French oceanographer, author, and motion-picture producer, emphasizing the development of the aqualung and his achievements in exploring the world under the sea.

Oasis in Space

The Living Sea

The Fantastic Undersea Life of Jacques Cousteau

Calypso

Examines the life and accomplishments of undersea explorer, scientist, filmmaker, sailor, and inventor of the aqua-lung.

By popular demand, the 100th Who Was...? subject is Steve Irwin! Steve Irwin did not have a typical childhood. Born in Melbourne, Australia, on February 22, 1962, he was raised on the wildlife park his parents owned. He cared for the animals and especially loved reptiles--he got a python for his sixth birthday! At nine years old, Steve was already helping his father wrestle small crocodiles. He became a crocodile trapper after graduating high school, catching the creatures before dangerous poachers could. Steve met his wife, Terri, at his family's park, and instead of a honeymoon, the pair filmed a wildlife documentary that led to the creation of the well-known series The Crocodile Hunter. Tragically, Steve was killed on September 4, 2006 while filming a documentary when a stingray attacked, piercing his heart. He was forty-four years old. However, his life's work obviously still strikes a chord with kids who voted him the winner of the 100th Who Was...? title.

Poetic text and full color paintings combine to create a portrait of the internationally known oceanographer as a curious little boy whose love of the ocean inspired him to grow up to become a champion of the seas.

An oceanographer, conservationist, and inventor, Jacques Cousteau was a pioneering sea explorer. Historic photos and easy-to-read text take readers into the athlete's life. Discover the bold secrets to Israel’s incredible track record of success in this new guide that will help make any startup unstoppable. More than half of all startups fail – often during the crucial early stages of development when they need to prove their viability on a limited budget. However, when it comes to startup success, one country stands out: Israel. Even though it is a relatively small country, Israel has one of the highest concentrations of startups in the world, has the highest venture capital per capita, is one of the top countries in terms of number of companies listed on NASDAQ, and is well-recognized as a global leader in research and development. In The Unstoppable Startup, veteran venture capitalist Uri Adoni goes behind the scenes to explain the principles and practices that can make any startup, anywhere in the world, become an unstoppable one. Packed with insider accounts from leaders who have realized bold visions, The Unstoppable Startup distills Israeli chutzpah into six operational rules that will help you to: Build an unstoppable team; Foresee the future and innovate to meet its demands; Manage your funding and partnerships through all phases of growth; Dominate the market category you are after or create a new one; Build and manage an early stage investment vehicle; Build and grow a healthy high-tech ecosystem. Adoni implemented these practices throughout his more than 12 years as a venture capitalist for one of Israel's most successful venture funds, and he continues to utilize these same proven startup strategies today in metropolitan areas in the US. The Unstoppable Startup provides readers with insights and operational advice on how to run a startup, and how to overcome challenges?that almost every startup faces.

Provides a look at the challenging father-son relationship and recounts the life and career of undersea explorer Jacques Cousteau.

A simple biography of the French oceanographer whose underwater explorations have focused the world's attention on the beauty of ocean life and the need to conserve that life.

Jacques Cousteau

My Life with Jacques Cousteau

*CH*Biographies

The beloved explorer Jacques Cousteau witnessed firsthand the complexity and beauty of life on earth and undersea-and watched the toll taken by human activity in the twentieth century. In this magnificent last book, now available for the first time in the United States, Cousteau describes his deeply informed philosophy about protecting our world for future generations. Weaving gripping stories of his adventures throughout, he and coauthor Susan Schiefelbein address the risks we take with human health, the overfishing and sacking of the world's oceans, the hazards of nuclear proliferation, and the environmental responsibility of scientists, politicians, and people of faith. This prescient, clear-sighted book is a remarkable testament to the life and work of one of our greatest modern adventurers.

Virtually an encyclopedia of the undersea world, this magnificent and comprehensive volume covers all aspects of life in the oceans. It is illustrated throughout with over 385 photographs, plus maps and diagrams.

In this title, readers will explore the undersea world with Jacques Cousteau. Follow Cousteau’s journey as he travels the world documenting sea life, improving underwater gear, and protecting the environment. Aligned to Common Core Standards and correlated to state standards. Checkerboard Library is an imprint of Abdo Publishing, a division of ABDO.
