Explains how self-delusion is part of a person's psychological defense system, identifying common misconceptions people have on topics such as caffeine withdrawal, hindsight, and brand loyalty.

God. Whether one loves him, hates him, denies or defies him, it is hard to deny the worldwide fascination with God. This book explores why and suggests a personal response to the God Attachment in all of us. Why has the human race, the world over, been so fascinated with . . . some might say obsessed with . . . God? This built-in attachment to God crosses religious, political, ethnic, cultural, and generational barriers. Drs. Clinton and Straub reveal fascinating research about this worldwide phenomenon. From avoidant, anxious, and fearful to secure and personal, the range of responses to our internal attachment to God has a profound influence on the way we do relationships, intimacy, and life choices. With helpful self-assessments, intriguing questions, and surprising revelations, this book moves from worldwide statistics to personal challenge, offering the means to become securely attached to God in a way that can have positive effects on our attitudes, approach to life, and overall life satisfaction.

Readers discover how temperament affects their work, emotions, spiritual life, and relationships and learn how to make improvements.

In his phenomenal #1 New York Times bestseller *Act Like a Lady, Think Like a Man*, Steve Harvey told women what it takes to succeed in love. Now, he tells everyone how to succeed in life, giving you the keys to fulfill your purpose. Countless books on success tell you what you need to get that you don't already possess. In *Act Like a Success, Think Like a Success*, Steve Harvey tells you how to achieve your dreams using the gift you already have. Every one of us was born with a gift endowed by our creator—something you do the best at with very little effort. While it can be like someone else's, your gift is yours alone. No one can take it away. You are the only one who can use it—or waste it. Steve shows how that gift holds your greatest chance at success, and the fulfillment of your life's mission and purpose. He helps you learn to define your gift—whether it's being a problem solver, a people-connector, a whiz with numbers, or having an eye for colors. He makes clear that your job is not your gift; you may use it in your work, but it can also be used in your marriage or relationship, your community, and throughout every aspect of your life. Throughout, he provides a set of principles that will help you direct your gift. “The scriptures say your gift will make room for you and put you in the presence of great men,” Steve reminds us. This book is your roadmap to identifying your gift, acknowledging it, perfecting it, connecting it to a vehicle, and riding it to success. Because Success is the gift you already have.” Funny yet firm, told in Steve's warm and insightful voice, and peppered with anecdotes from his own life, practical advice, and truthful insights, this essential guide can help you transform your life and achieve everything you were born to.

Explores a new and effective method for seizing opportunity in the face of uncertainty in *Provoke: How Leaders Shape the Future by Overcoming Fatal Human Flaws*, renowned strategy consultants and best-selling authors Geoff Tuff and Steven Goldbach deliver an insightful exploration of how people tend to act tentatively in the face of uncertainty and provide the tools we need to do things differently. Tuff and Goldbach offer up a compelling argument for the proposition that taking a “wait and see” approach is the exact opposite of what helps visionary lead the world. Drawing on principles from business and behavioral economics, the book shows readers from all walks of life how to provoke action as a mechanism to advance. In this book you'll discover: An overview of the assortment of cognitive biases which tend to restrain and distort leadership decision making in the face of uncertainty How to recognize the ‘phase change’ that occurs when an uncertainty resolves from being a question of “if” to being a matter of “when” Five different models of provocation which can be used alone or in combination to anticipate and drive through and exit that phase change in a way that creates the future you desire How true “provocateurs” shake the foundations of their industries, firms, sectors, and governments by overcoming their need for certainty before action Perfect for leaders or aspiring leaders in all walks of life where uncertainty abounds—which is to say, almost everywhere —Provoke will become your go-to guide to overcoming those natural human instincts that keep us frozen in place and prevent us from seizing our opportunities.

The answer for Why Do People Act That Way? can be found in the interactions of our perceptions, emotions, motivations and behaviors. Discover the four essential complexes and the five basic emotional systems as the keys to the understanding and influencing the people around you. In life, there are no bad emotions, nor good emotions. They are just that -- human emotions. The real question lies in what we do with them. What this book will do for you: -- Teach you practical skills you can use daily to disentangle complicated or difficult situations and relationships. -- Give you insight into the four key complexes of the mind and how they shape our sense of reality. -- Offer tools for accurate understanding and effective resolution of the five emotional systems. -- Help you to ask questions, get answers, and then ask better questions. -- Identify your own storyline in a way that may help you resolve some lifelong issues.

Every life is an interesting story, and this story is best written when people go through life's experiences by staying connected to who they truly are. To stay connected to yourself, you need first to start listening from within. This book gives a perspective on why we think, feel and act the way we do, through concepts from neuroscience and psychology. It attempts to answer some of life's key questions, such as-- Why do we all perceive things differently? - Why are we designed to do different things? - Why do we all learn things in different ways? - How are habits formed? - What role do emotions play in our lives? - What makes us happy? And finally, what it means and takes to stay connected to ourselves and others. "Great ideas for a better living, that not only help you to connect with yourself but also to connect with others." Dr. David J Lincoln – Chief advisor and president ANLP India. "The simplicity of ideas and the depth of knowledge make this book a must-read for leaders everywhere." Rajat Garg Master Certified Coach & Director, Global Board of Directors for The ICF (International Coaching Federation) "Vishal brings to life and connects many aspects of living with facts about the brain and how the human mind works. These easy to read and well-structured reflections ‘from the heart’ show the simple aspects of living life fully." Chitra Ravi Founder & Principle consultant at SeedTLC, Regional Representative for India & Asia on the Board of Trustees of the ITAA (International Transactional Analysis Association) **Have you ever just wondered about life? What is Life? Is there God? How do we fit into the universe? What is our relationship with other living things? What does it mean to be human? Doctor Ergo provides you with a firm background and vantage point from which to view those questions. You will gain a comprehensive perspective on Life and the human condition - from the Big Bang, through Life history on this planet, to the current condition of our human mind and species, and some solid thoughts on what Life...is. This is a Story of Life. In a Darwinian world, our mental capacity has enabled us to ascend to the pinnacle of the survival pyramid. Therefore, the essence of the story about our species centers on our mind. Our cognitive skills are built upon the neural architectures that originally developed for vision and for speech/hearing. We can be aware of the 2 sides of our mind through introspection of our own consciousness: Vision based - non-verbal emotions, feelings and intuitions coming from our vision-based cognition in our Right Brain. Speech based - words, thoughts, and reasoning coming from our speech-based cognition in our Left Brain. Vision developed quickly in the Cambrian Period (570 million years ago) when the earliest animals with body forms emerged. Vision enabled the animal to see the "world," and gave the animal a sense of "self," i.e. that which was viewing the world. Consequently the concepts of "world" and "self" are deeply embedded in the cognition that developed from the vision neurological architecture. Likewise, Darwinian survival necessitated identification of same-species animals (for protection and reproduction); hence the concept of "group" is also deeply embedded in the vision-based neurology. Our speech-based left brain has no equal anywhere else in Life on this planet. This is what has made possible the major advances of the human mind, separated us from the animals, and enabled us to conquer the planet. This Sensory Mind model clarifies Plato's writings and the psychological models that were developed by Sigmund Freud and Carl Jung. The personality types tested by Myers-Briggs, which are based on the theories of Carl Jung, are consistent with the Sensory Mind. Major trends in human history have been about the growth of our collective left brain in the governance of human affairs and its interplay with our vision-based (non-verbal) right mind. Our human "advances" have largely resulted from development of our speech-based mind, but the essence and truth of Life comes to us from our vision-based mind. Our earliest groupings and civilizations were largely governed by vision-based animal grouping models. These have evolved into newer civilizations and human groupings that include participation and/or leadership of our left brain "group-think." We are very familiar with the concept of Darwinian survival and its role in the evolution of Life. However, Darwinian survival is simply the strategy or tactic that governs the advancement of Life. What is it that drives Life to engage in the Darwinian struggle for survival? There IS a Life Drive that fuels evolution...what is it? The Life Drive permeates all of life and is the force that drives Darwinian evolution. It is theorized that Life is a previously unidentified parameter in Einstein's Theory of Relativity and that it exists at the conditions opposite to the Big Bang conditions. Most religious and belief systems, whether god-based such as Judaism, Christianity, or Islam, or spiritually-based such as Buddhism or Taoism, are oriented towards the ultimate truth that is Life.**

In the classic Mere Christianity, C.S. Lewis, the most important writer of the 20th century, explores the common ground upon which all of those of Christian faith stand together. Bringing together Lewis’ legendary broadcast talks during World War Two from his three previous books The Case for Christianity, Christian Behavior, and Beyond Personality, Mere Christianity provides an unequalled opportunity for believers and nonbelievers alike to hear this powerful apologetic for the Christian faith.

From the #1 New York Times-bestselling author of The 48 Laws of Power comes the definitive new book on decoding the behavior of the people around you Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people's drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people's masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, The Laws of Human Nature offers brilliant tactics for success, self-improvement, and self-defense.

In The 5 Love Languages, you will discover the secret that has transformed millions of relationships worldwide. Whether your relationship is flourishing or failing, Dr. Gary Chapman's proven approach to showing and receiving love will help you experience deeper and richer levels of intimacy with your partner starting today.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admissions have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator. The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

The answer to why people feel and act the way they do lies in the profound effect of a child's bonding process with his or her parents. How successfully we form and maintain relationships throughout life is related to those early issues of "attachment." The author has cited four primary bonding styles that explain why people love, feel, and act the way they do. This book is for anyone who desires closeness, especially in the most intimate relationships: marriage, parenting, close friends, and ultimately with God.

A child-friendly format for the classic book on how emotions and behaviors interact With wacky characters, varied type faces, and vivid colors, this picture book introduces the vocabulary of values with nonjudgmental language. A wide variety of character traits presents kids with scenarios they can identify with, including peering at bugs with a magnifying glass, making the bed, and finishing a puzzle. Additional examples define words such as "curious," "responsible," "persistent," and "capable." The scenarios let children imagine how they might act in a number of common situations. The Way I Act provides parents with guidance on how to talk to their children about the difference between feelings and actions and the choices that kids can make in their behavior.

Seth's best friend, Jacob, broke Seth's truck. Seth knows it was an accident, but still, it was his favorite toy! He tells Jacob to go home and not come back. But when Seth goes to visit his neighbor, Grandma Grace, he accidentally breaks a lamp.

It was only supposed to be a short visit. It turned into a love affair. Melanie White is in trouble. Young, unmarried, with no resources to speak of, she's forced to flee home and hide out with her aunt on a ranch in a western mining town. She's just passing through on her way farther West, and it's a good thing, too: she can't stand the ranch owner. He's rowdy, immature...and undeniably attractive. David Tanner has his life just the way he likes it: he does what he wants, when he wants, and nobody can tell him any different--least of all, his former nanny's niece Melanie, who likes books more than people. But when a family emergency forces Melanie and David to work together, she discovers that there's more to him than meets the eye. And he finds out that life as a bachelor may not be what he likes after all. Contains mild language and sensual content within marriage.

The most dangerous move in business is the failure to make a move. Global business celebrity and prime-time Bloomberg Television host, Jeffrey W. Hayzlett empowers business leaders to tie their visions to actions, advancing themselves past competitors and closer to their business dream. Drawing upon his own business back stories including his time as CMO of Kodak and sharing examples from the many leaders featured on “The C-Suite with Jeff Hayzlett,” Hayzlett imparts ten core lessons that dare readers to own who they are as a leader and/or company, define where they want to go, and fearlessly do what it takes to get there—caring less about conventional wisdom, re-framing limitations, and steamrolling obstacles as they go. Customers who like books by Kristin Hannah, Luanne Rice, Robyn Carr and Susan Wiggs will enjoy this emotional and romantic piece of contemporary fiction from #1 New York Times Bestselling Author Barbara Freethy. This is a full length novel of approximately 100,000 words. Take a romantic journey with award-winning author Barbara Freethy to Tucker's Landing, Oregon, where Sam and Alli Tucker have made a life together . . . a life about to be tested by the return of the only woman who can break them up . . . Alli's sister, Tessa. A baby brought them together -- and even though Alli has always loved her strong, sexy husband Sam and the life they've built together, she has decided to set him free to follow his youthful dreams. It is no longer enough for her to be wife and lover when she knows she holds so little of his heart. Sam has always dreamed of a life away from the close-knit world of Tucker's Landing, but marriage and fatherhood ended all that. Now Sam is torn between what was and what was meant to be. He must decide if it's time to rekindle the dreams of the past . . . or accept Alli, and her love, just the way she is.

New York Times Bestseller Over 2.5 million copies sold For David Goggins, childhood was a nightmare - poverty, prejudice, and physical abuse colored his days and haunted his nights. But through self-discipline, mental toughness, and hard work, Goggins transformed himself from a depressed, overweight young man with no future into a U.S. Armed Forces icon and one of the world's top endurance athletes. The only man in history to complete elite training as a Navy SEAL, Army Ranger, and Air Force Tactical Air Controller, he went on to set records in numerous endurance events, inspiring Outside magazine to name him The Fittest (Real) Man in America. In this curse-word-free edition of Can't Hurt Me, he shares his astonishing life story and reveals that most of us tap into only 40% of our capabilities. Goggins calls this The 40% Rule, and his story illuminates a path that anyone can follow to push past pain, demolish fear, and reach their full potential.

Mining the Bible for advice, the author shows a new generation how to develop physical, mental, and spiritual harmony in marriage. Original.

This book challenges, with several powerful arguments, some of our deepest beliefs about rationality, morality, and personal identity. The author claims that we have a false view of our own nature; that it is often rational to act against our own best interests; that most of us have moral views that are directly self-defeating; and that, when we consider future generations the conclusions will often be disturbing. He concludes that moral non-religious moral philosophy is a young subject, with a promising but unpredictable future.

An honest and groundbreaking guide to understanding the complicated emotions that develop between stepmothers and children. When faced with often overwhelming challenges, what woman with stepchildren is unfamiliar with that “stepmonster” feeling? Half of all women in the United States will live with or marry a man with children. To guide women new to this role—and empower those who are struggling with it—Wednesday Martin draws upon her own experience as a stepmother. She's frank about the harrowing process of becoming a stepmother, she considers the myths and realities of being married to a man with children, and she counteracts the cultural notion that stepmothers are solely responsible for the problems that often develop. Along the way, she interviews other stepmothers and stepchildren and offers up fascinating insights from literature, anthropology, psychology, and evolutionary biology that explain the little-understood realities of this unique parent-child relationship and—in an unexpected twist—shows why the myth of the Wicked Stepmother is the single best tool for understanding who real stepmothers are and how they feel.

A superb treatment of the basic human temperaments and how God can use them, now revised with new chapters and questions for group study.

The book Transformed Temperaments is the result of additional research into the subject and further counseling with people in trouble its inspiration came when the author found transformation of temperament in the lives of several Bible character which he expect to find Spirit-filled Christians today

Describes the evolutionary origins of various aspects of human appearance and behavior, including why hiccups occur, why humans laugh, and why they are programmed to eat junk food.

Health and science journalist Chelsea Conaboy explores the concept of 'maternal instinct' and tells a new story about what it means to become a parent. Conaboy expected things to change with the birth of her child. What she didn't expect was how different she would feel. But she would soon discover what was behind this: her changing brain. Though Conaboy was prepared for the endless dirty diapers, the sleepless nights, and the joy of holding her newborn, she did not anticipate this shift in self, as deep as it was disorienting. Mother Brain is a groundbreaking exploration of the parental brain that untangles insidious myths from complicated realities. New parents undergo major structural and functional brain changes, driven by hormones and the deluge of stimuli a baby provides. These neurobiological changes help all parents/birthing or otherwise/expect in those intense first days and prepare for a long period of learning how to meet their child's needs. Pregnancy produces such significant changes in brain anatomy that researchers can easily sort those who have had one from those who haven't. And all highly involved parents, no matter their path to parenthood, develop similar caregiving circuitry. Yet this emerging science, which provides key insights into the wide-ranging experience of parenthood, from its larger role in shaping human nature to the intensity of our individual emotions, is mostly absent from the public conversation about parenthood. The story that exists in the science today is far more meaningful than the idea that mothers spring into being by instinct. Weaving the latest neuroscience and social psychology together with new reporting, Conaboy reveals unexpected upsides, generations of scientific neglect, and a powerful new narrative of parenthood.

Why You Believe, Act, and Feel the Way You Do About God

Spirit-Controlled Temperament

Book Three of the Love's Territory Series

From the Man Booker Prize Longlisted author of My Name is Lucy Barton? Isabelle Goodrow has been living in self-imposed exile with her daughter Amy for fifteen years. Shamed by her past and her affair with Amy's father, she has submerged herself in the routine of her dead-end job and her unrequited love for her boss. But when Amy, frustrated by her quiet and unemotional mother, embarks on an illicit affair with her maths teacher, the disgrace intensifies the shame Isabelle feels about her own past. Throughout one long, sweltering summer, as the events of the small town ebb and flow around them, Amy and Isabelle exist in silent conflict until a final act leads ultimately to the understanding they both crave.

Have you ever met anyone who didn't have some behavior he or she couldn't stand? Why do we so often continue to behave in ways that make us unhappy? Why don't we learn from our mistakes? Why does willpower fail? Have you adopted the qualities that you hated in your parents? Do you wonder why? Many of the available self-help books give advice and present general ideas about the cause of our problems but do not provide in-depth insight into the reasons behind our behavior. They don't tell us why it is so difficult to follow their advice or our own desires and to overcome our problems. Why You Behave in Ways You Hate does. Dr. Gootnick explains why children blame themselves for their parents' faults and how this creates hidden, destructive mind-sets that cause the behaviors that plague us. In a clear, straightforward way,

he shows you how to see past the psychological blinders that make it difficult for you to see how these mind-sets operate and then to take effective action. Seven charts identify specific behaviors and allow you to look up your personal problem and understand at a glance how it originated or how you may have responded to it. Using individual personality profiles of you and your family members, you will be able to analyze what happened in the past and to institute changes in your thinking and behavior. In addition, because Why You Behave in Ways You Hate is based on family dynamics, it is an invaluable asset for parents working on problems they may have with their children. It will help break the generational cycle of doing to your children what was done to you. Who is this book for? Its for anyone who has difficulty in achieving success in school or a career, who repeatedly get involved in bad relationships, or who have trouble extricating themselves from abusive relationships. It also appeals to parents who have problems with their children, to those who feel insecure, inadequate, or depressed without cause, and to individuals who have problems with addictions or weight control, or who sacrifice their own interests for others. Why we act the way we do; how we talk about it addresses communication difficulties in relationships. Using the couple relationship as her model, Dr. Danks illustrates that all communication is based in the behavior of the person attempting to communicate. Because so many are unaware of their own behavior and motivations, communication is ineffective. Part I defines behavior and the ways in which it manifests with different personalities; Part II allows the reader to communicate in an honest and non-threatening manner. Communication blunders are identified along with effective ways to avoid them. Ideal for families, teachers, coaches and anyone who supervises or prepares others for leadership.

The perfect reality is just a thought away, but it comes at a chilling price. In a near future world, a social network by the name of MINDS gifts its users with the unique ability to communicate directly by thoughts and recreate reality by their deepest fantasies and desires. In the MINDS network, desires are actualized in a split of a second and unwanted elements erased from reality. The advanced algorithms of MINDS enable the user to virtually visit any place in the world or in history within seconds, in an utterly realistic three-dimensional reality. Humans can use their mind to determine everything they please - from the weather to the way their friends look like and behave. But the ultimate comfort comes at a price, and the unexpected results reveal the grand plan behind MINDS. What stands behind this magnificent social network, and what are the consequences when the virtual merges with the actual? Netopia follows the heroes of the network in the days before its establishment, through its launch, relationships and love, and the unexpected change it wreaks on the enthusiastic users who had no idea what awaited them the moment they gave up control over their minds. Is the MINDS network a dream come true or a nightmare come to life? Netopia is beyond science fiction: it is a groundbreaking novel that explores the implications of communication technology on human nature and society, the preference of warmth for realistic animal doll pets but coldness towards humans. the novel speaks to the connected and to the disconnected, to the great minds and the Neverminds. Netopia is a gleaming hope and a dark warning. So, where is your mind? Scroll up to grab your copy now.
