Burgundy, Switzerland, Germany, California, Australia, New Zealand and South Africa, tells the epic story of Burgundy, a 2000-year adventure with its ups and downs. The oldest vineyard discovered by archaeologists dates back to the first century A.D. By the third century, Burgundy wines were already famous in the Roman Empire. Burgundy was a powerful state in the 15th century, which was also a golden age for its viticulture. The book covers: the red and white cultivars that are to be found in Burgundy the Appellations Contrôlées system the tasks the wine grower performs during the year the social life of wine growers the scourges the wine grower fears how religion has played at part in the

history of viticulture the factors that contributed to
making Burgundy wines famous what new challenges
growers are facing today In this entertaining and
informative book, the author's approach to viticulture
reconciles the present, the past, and the future. The
volume will appeal to wine buffs as much as it does
to readers who wish to learn about viticulture. It's a
serious book that doesn't take itself seriously.

Throughout history, waves of invaders have coveted the northeast corner of France: Attila the Hun in the fifth century, the English in the Hundred Years War, the Prussians in the nineteenth century. Yet this region - which historians say has suffered more battles and wars than any other place on earth - is also the birthplace of one thing the entire world equates with good times, friendship and celebration:

Wine drinking culture in France has traditionally been a source of pride for the French and in an age of concerns about the dangers of 'binge-drinking', a major cause of jealousy for the British. Wine drinking and the culture associated with it are, for many, an essential part of what it means to be French, but they are also part of a national construction. Described by some as a national

"A survey of the long-term history of wine in France, this is a readable and relatively compact history of the 2,500 years that separate the present from the time that Etruscans, Greeks, and Romans first brought to ancient France and planted the first vineyards there. The book traces this long history at a number of levels: the

every respect. Revolving around shiftless father Fyodor Pavlovich Karamazov are the fates of his three sons, each of whom has fortunes entwined with the others. The eldest son, Dimitri, seeks an inheritance from his father and becomes his rival in love. Ivan, the second son, is so at odds with the world that he is driven near to madness, while the youngest, Alexi, is a man of faith and a natural optimist. These personalities are drawn out and tested in a crucible of conflict and emotion as the author forces upon them fundamental questions of

morality, faith, reason and responsibility. This charged situation is pushed to its limit by the addition of the unthinkable, murder and possible patricide. Using shifting viewpoints and delving into the minds of his characters, Dostoevsky adopted fresh techniques to tell his wide-reaching story with power and startling effectiveness. The Brothers Karamazov remains one of the most respected and celebrated novels in all literature and continues to reward readers beyond expectation. the first force, globalization, which is shifting the center of the wine world as global wine markets provide enthusiasts with a rich but overwhelming array of choices. Two Buck Chuck, the second force, symbolizes the rise of branded products like the famous Charles Shaw wines sold in Trader Joe's stores. Branded corporate wines simplify the worldwide wine market and give buyers the confidence they need to make choices, but they also threaten to dumb down wine, sacrificing terroir to achieve marketable McWine reliability. Will

globalization and Two Buck Chuck destroy the essence of wine? Perhaps, but not without a fight, Veseth argues. He counts on "the revenge of the terroirists" to save wine's soul. But it won't be easy as wine expands to exotic new markets such as China and the very idea of terroir is attacked by both critics and global climate change. Veseth has "grape expectations" that globalization, Two Buck Chuck, and the revenge of the terroirists will uncork a favorable future for wine in an engaging tour-de-force that will appeal to all lovers of

Burgundy, Bordeaux, Champagne. The names of these and other French regions bring to mind time-honored winemaking practices. Yet the link between wine and place, in French known as terroir, was not a given. In The Sober Revolution, Joseph Bohling inverts our understanding of French wine history by revealing a modern connection between wine and place, one with profound ties to such diverse and sometimes unlikely issues as alcoholism,

drunk driving, regional tourism, Algeria's independence from French rule, and integration into the European Economic Community. In the 1930s, cheap, mass-produced wines from the Languedoc region of southern France and French Algeria dominated French markets. Artisanal wine producers, worried about the impact of these "inferior" products on the reputation of their wines, created a system of regional appellation labeling to reform the industry in their favor by linking quality to the place of origin. At the same time, the loss of

Algeria, once the world's largest wine exporter, forced the industry to rethink wine production. Over several decades, appellation producers were joined by technocrats, public health activists, tourism boosters, and other dynamic economic actors who blamed cheap industrial wine for hindering efforts to modernize France. Today, scholars, food activists, and wine enthusiasts see the appellation system as a counterweight to globalization and industrial food. But, as The Sober Revolution reveals, French efforts to localize

History of France is a thoroughly original book that explores the facts and legends of the most popular French foods and wines. Traversing the cuisines of France's most famous cities as well as its underexplored regions, the book is enriched by the "authors' friendly accessibility that makes these stories so memorable" (The New York Times Book Review). This innovative social history also explores the impact of war and imperialism, the age-old tension between tradition and innovation, and the enduring use of food to prop up social and political identities. The origins of the most legendary French foods and wines—from Roquefort and cognac to croissants and Calvados, from absinthe and oysters to Camembert and champagne—also reveal the

France, it proved to be one of the most valuable French commodities in the eyes of the Nazi leaders. In 1940, "Weinführer" (official delegates and wine experts appointed by Berlin), were sent to all the wine regions of France to coordinate the most intense looting that the country had ever seen. Alongside the very ambiguous relationship of the Vichy Regime and the collaboration of many French professionals with the occupiers, this immense program of wine collection was a drama that many would prefer to forget. Now, more than seventy years after the end of the conflict, the time has come to tell the story of what really happened. A tour of the French winemaking regions to illustrate how the soil, underlying bedrock, relief, and microclimate shape the personality of a wine. For centuries, France has long been the world's greatest wine-producing country. Its wines are the global gold standard, prized by collectors, and its winemaking regions each offer unique tasting experiences, from the spice of Bordeaux to the berry notes of the Loire Valley. Although grape variety, climate, and the skill of the winemaker are essential in making good

wine, the foundation of a wine's character is the soil in which its grapes are grown.

Who could better guide us through the relationship between the French land and the wine than a geologist, someone who deeply understands the science behind the soil? Enter scientist Charles Frankel. In *Land and Wine*, Frankel takes readers on a tour of the French winemaking regions to illustrate how the soil, underlying bedrock, relief, and microclimate shape the personality of a wine. The book's twelve chapters each focus in-depth on a

Isabelle Saporta (Booklist). In recent decades, Bordeaux has come under the influence of large-scale international investors. Unafraid to name names, Saporta sheds a harsh light on how this influence has corrupted the region's centuries-old traditions of winemaking excellence. She uncovers how the classification system was manipulated in 2012 to ensure that the wines of Saint-Émilion-Bordeaux's most prestigious appellation—were certified premier grand cru classé A. In other chapters, Saporta investigates issues of wine labeling and pesticides, and draws comparisons to Champagne, Burgundy, and the rest of the wine world. "This fast-paced, provocative read" is a cri de coeur for the lost values of traditional winemaking (Dave DeSimone, Pittsburgh Tribune Review).

A History

During the past eight decades French vineyards, wineries, and wine marketing efforts have undergone such profound changes--from technological, scientific, economic, and commercial standpoints--that the transformation is revolutionary for an industry dating back thousands of years. Here Leo Loubre examines how the modernization of Western society has brought about new conditions in well-established markets, making the introduction of novel techniques and processes a matter of survival for winegrowers. Not only does Loubre explain how altered environmental conditions have enabled pioneering enologists to create styles of wine more suited to contemporary tastes and living arrangements, but he

also discusses the social impact of the wine revolution on the employees in the industry. The third generation of this new viticultural regime has encountered working and living conditions drastically different from those of its predecessors, while witnessing the near disappearance of the working class and the decline of small and medium growers of ordinary wines. In *War, Wine, and Taxes*, John Nye debunks the myth that Britain was a free-trade nation during and after the industrial revolution, by revealing how the British used tariffs—notably on French wine—as a mercantilist tool to politically weaken France and to respond to pressure from local brewers and others. The book reveals that Britain did not transform smoothly from a mercantilist state in the eighteenth century to a bastion of free trade in the late nineteenth. This boldly revisionist account gives the first satisfactory explanation of Britain's transformation from a minor power to the dominant nation in Europe. It also shows how Britain and France negotiated the critical trade treaty of 1860 that opened wide the European markets in the decades before World War I.

Going back to the seventeenth century and examining the peculiar history of Anglo-French military and commercial rivalry, Nye helps us understand why the British drink beer not wine, why the Portuguese sold liquor almost exclusively to Britain, and how liberal, eighteenth-century Britain managed to raise taxes at an unprecedented rate—with government revenues growing five times faster than the gross national product. *War, Wine, and Taxes* stands in stark contrast to standard interpretations of the role tariffs played in the economic development of Britain and France, and sheds valuable new light on the joint role of commercial and fiscal policy in the rise of the modern state.

and quality takes us on an intimate tour through family-owned vineyards in France and Italy and reflects upon the last three decades of controversy, hype, and change in the world of wine. In the late 1970s, Neal I. Rosenthal set out to learn everything he could about wine. Today, he is one of the most successful importers of traditionally made wines produced by small family-owned estates in France and Italy. Rosenthal has immersed himself in the culture of Old World wine production, working closely with his growers for two and sometimes three generations. He is one of the leading exponents of the concept of "terroir"—the notion that a particular vineyard site imparts distinct qualities of bouquet, flavor, and color to a wine. In *Reflections of a Wine Merchant*,

Rosenthal brings us into the cellars, vineyards, and homes of these vigneron, and his delightful stories about his encounters, relationships, and explorations—and what he has learned along the way—give us an unequalled perspective on winemaking tradition and what threatens it today. Rosenthal was featured in the documentary film *Mondovino* and is one of the more outspoken figures against globalization, homogenization, and the "critic-ization" of the wine business. He was also a major subject in Lawrence Osborne's *The Accidental Connoisseur*. His is an important voice in defense of the individual and the artisanal, and their contribution to our quality of life.
