

Wine Consumption The Wine Institute

This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

This collection of essays comprises a number of case studies from key wine-growing regions and countries around the world. Contributors focus on the development of the wine business and its overall importance and impact in terms of the regional and domestic economy and the international economy

Marketing California Wine and Brandy

Wine is big business in the United States:with over \$68 billion in 2018 retail sales (Wine Institute, 2019). The U.S. boasts over 10,000 wineries, which when combined with significant imports from across the globe, create a multitude of choices for consumers. Further complicating the purchase decision is the consumption occasion, the question of where and with whom wine is intended to be enjoyed. The purpose of this study is to improve the understanding of consumers' interaction with typeface on wine labels and how that interaction impacts: (1) purchase intent in wine consumption scenarios of varying perceived risk and (2) perceptions of brand credibility. Sixteen typefaces were pretested by 106 respondents recruited through Amazon Mechanical Turk (MTurk), who determined Monotype Corsiva typeface was the most appropriate typeface for use on a cabernet sauvignon wine label and Impact typeface was the least appropriate. Main experiment participants (N = 154) again recruited through MTurk) were randomly presented with one of four wine consumption occasions (e.g., home, gift, family dinner, and business dinner) and asked to select a wine bottle for purchase between two digitally presented wine bottles:each utilizing the typefaces selected in the pretest. Participants were also asked questions surrounding risk perceptions relative to the act of purchasing wine as well as brand credibility perceptions of the wine bottle selected in the choice experiment. Respondents selected the wine with the label utilizing the most appropriate typeface/ regardless of wine use occasion. The study's results, however, failed to support a strong relationship between brand credibility and purchase intent. From a managerial perspective, this study's results suggest wine companies would benefit from: (1) testing label typefaces with consumers to assess appropriateness (an apparent proxy for likeability and purchase intent) and (2) utilizing typefaces ranking high from such tests on wine labels.

A Compelling Exploration of the Emerging Secular Spirituality What is faith? It is not something we must receive from a religion, nor is it a quality we must abandon in order to be rational. "Faith is not the same as belief," writes bestselling author Roger Housden. "A nonreligious faith allows us to live with uncertainty, change, and mortality—to embrace life in all its self-identity as "spiritual but not religious." Housden's book Keeping the Faith Without a Religion offers us a way to embrace the extraordinary mystery of our lives without resorting to blind dogmatism or nihilistic scientism. He invites us to investigate: Faith and belief—how our hunger for certainty and easy answers impedes the growth of a mature spirituality Guide based on your own inner experience How faith in life's uncertainty can lift us through hard times—even when we know there are no guarantees Love, joy, and beauty—what these experiences can teach us about the intelligence of the universe Today, many of us seek a new approach to spirituality that honors both the rational and the mystical in equal measure. Wine & the Consumer

Religion, Roger Housden offers a guidebook for free-thinking seekers—an inspiring call to step beyond the need for one absolute truth and trust ourselves to the unfolding of our singular, extraordinary life.

Analytical Perspectives on the California Wine Industry, 1935-1990

California is the nation's great vineyard, supplying grapes for most of the wine produced in the United States. The state is home to more than 700 wineries, and California's premier wines are recognized throughout the world. But until now there has been no comprehensive guide to California wine and winemaking. Charles L. Sullivan's A Companion to California Wine admirably fills that gap—here is the reference work for consumers, wine writers, producers, and scholars. Sullivan's encyclopedic handbook traces the Golden State's wine industry from its mission period and Gold Rush origins down to last year's planting and vintage statistics. All aspects of wine are included, and wine production from vine propagation to bottling is described in straightforward language. There are entries for some 750 wineries, both historical and contemporary; for more than 100 wine grape varieties, from Aleatico to Zinfandel; and for wine types from claret to vermouth—all given in a historical context. In the book's foreword the doyen of wine writers, Hugh Johnson, tells of his own forty-year appreciation of California wine and its history. "Charles Sullivan's Companion," he adds, "will provide the grist for debate, speculation, and reminiscence from now on. With admirable dispassion he sets before us just what has happened in the plot so far."

How can a small winery possibly compete with the marketing of massive wine companies? How can it hope to capture the over-stimulated mindshare of the modern consumer? By being strategic. This revised and updated edition to the bestselling book puts the vast bank of wine marketing knowledge within reach of industry novices, and fresh, practical, and powerful strategies into the hands of veteran brand managers and marketing professionals. With 100 pages of new and expanded material, this book addresses such topics as importing and exporting; logistical management; marketing your tasting room and wine region as a prime tourist destination; how to generate greater retail sales; and how to grab the benefits, while avoiding the dangers, of social networking and viral marketing.

The Story of Wine and Its Uses

Master's Thesis from the year 2010 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1.3, Berlin School of Economics and Law, language: English, comment: includes the results of a survey done in Southern China in 2010., abstract: China is turning into one of the world's largest, most lucrative food and beverage markets. With a growing middle class, the demand for premium lifestyle products is constantly increasing. A new generation of consumers, typically located in urban areas, is emerging, with more disposable income and a greater awareness and willingness to pay for high quality, often imported products - including wine. Wine has become "fashionable" as a symbol of social status and this trend is likely to continue. Further, the health benefits associated with red wine in particular, have convinced some consumers to switch from traditional Chinese alcoholic beverages to grape wine. Although China traditionally is a rice-wine-consuming country and unlike in many Western countries, grape wine is considered a luxury product, the grape wine market has grown rapidly since its emergence in the mid 1990s, with still wine being the most lucrative. According to a recent survey, in 2009 the Chinese wine market generated total revenues of US\$ 7.2 billion which constitutes a compound annual growth rate of 5.3% for the period from 2005 to 20092. As wine consumption in China is closely related to income, there is no end in sight to this positive trend.

Written by the experts who train today's leading chefs and sommeliers, this invaluable guide thoroughly demystifies wine, from the basics of wine production to the nuances of wine lists, wine marketing, and wine service. Revised to reflect the many recent changes in the worldwide wine industry, the Second Edition of this critically acclaimed guide features an expanded American wines section, coverage of the latest developments in Italian wine and the new face of German and South American wine trades, and more.
