"The emotional effect of woodworking is that it gives kids that sense of accomplishment. Parents see a happy kid beaming with excitement of possibilities." Three years back, I asked one child psychologist: What is the best way to make a connection with my 8 and 13-year-olds as they are growing up? I was worried about excessive exposure to T.V, Mobile Phones and wanted to do some activity together to be much of an enabler and guide.

He said, " Why don't you try Woodworking in your backyard? That would serve all your purposes. " That was one of the best pieces of advice I got off late. Wood has always been mankind's favorite building material, but it has always had one major problem. Because it is an organic material, wood will always rot, whether sooner or later. That's a natural problem, but the modern world has provided an elegant and convenient solution. Nothing quite equals the satisfaction of building a project that adds charm and personality to your yard. If it is a memorable design and built well, even a small planter, trellis, or other feature will be a nice touch that makes your outdoor space more of a pleasure to use. Special details that complement the house or landscape can help to unify your outdoor space. A home-made project tailored to your space can tie it all together, adding your personal signature in a satisfying way. Who knows? Maybe one day your project may become a treasured heirloom. Natural wood (and bamboo, though it is technically a grass) is the ideal material for a modest do-it-yourself project. Whether stained or left alone to turn a weathered gray, your new structure will effortlessly harmonize with

leafy plants, colorful flowers, and nearby stone or brick surfaces. You also have the option of painting it a muted tone that barely asserts itself, or with bright colors that proudly announce its presence and make your yard a more whimsical place.
