Harbors magazine. John and Ruth started their business, Brooks Boats, in 1991. They design and build glued-lapstrake boats in West Brooklin, Maine-and get out to enjoy their handiwork in its proper element whenever they can. The vast majority of period ship models are built from kits,

usually primarily of wood with some ready-made fittings.

Although these commercial offerings have improved significantly in recent years, all of them can be enhanced in accuracy or detail by an experienced modelmaker. This book, by an expert ship modeller, distils

Download File PDF Wooden Boat Kit In Hobby

lessons gleaned from a lifetime practising the hobby to the highest standards, setting out methods of improving basic kits and gradually developing the skills and confidence to tackle the construction of a model from scratch. Using a variety of kits as the starting point,

Download File PDF Wooden Boat Kit In Hobby Models And Kits

each chapter demonstrates a technique that can be readily improved or a feature that can be replaced to the advantage of the finished model.

Topics include hull planking, representing copper sheathing, many aspects of more accurate masting and rigging, and how to

Download File PDF Wooden Boat Kit In Hobby Models And Kits

replace kit parts and fittings from scratch.

Ultimately, the impact of a period model depends on its accuracy, and the book also provides guidance on plans and references, where to find them and how they are best used. The plank-on-frame model, sometimes with

exposed frames in the Navy Board style, has always been considered the crowning achievement of period ship modeling, and this book concludes with coverage of the very latest kits that put fully framed models within the reach of ordinary mortals. Offering
