Because teacher collaboration isn't an option, it's a **MUST!** EL authorities Maria Dove and Andrea Honigsfeld take ESL teachers and their general education colleagues step-by-step through building a successful collaboration—or improving an existing one. And since no teaching team is exactly alike, you'll find seven collaborative models to choose from. Features include:

- In-depth profiles of the seven models
- Advantages and challenges of each model
- Clear explanations of each teacher's role
- Tried-and-true strategies for the entire instructional cycle: co-planning, co-instruction, co-assessment, and reflection
- Real-life accounts from co-teaching veterans
- Accompanying videos and dedicated web content

During an armed conflict or period of gross human rights violations, the first priority is a cessation of violence. For the cease-fire to be more than a lull in hostilities and atrocities, however, it must be accompanied by a plan for political transition and social reconstruction.

Essential to this long-term reconciliation process is education reform that teaches future generations information repressed under dictatorial regimes and offers new representations of former enemies. In *Teaching the Violent Past*, Cole has gathered nine case studies exploring the use of history education to promote tolerance, inclusiveness, and critical thinking in nations around the world. Dear students, I want to share a dream with you. I dreamed that a young person of 14 whom I was going to be teaching would become president of the United States during the first half of the twenty-first century. As a teacher, I was struck by this immense responsibility. What should I teach my student about the world as preparation for this awesome task? How could my world history class help this person to mature into an intelligent and humane president and leader of the free world?

This book is a practical guide for English language teachers and teacher educators seeking to carry out and promote teacher action research within their institutional context. Based on contemporary theory and a reflexive and social approach to teacher professional development and learning, it offers readers structured methodologies and concepts, wide-ranging hands-on activity sets, and focused suggestions for appropriate and sustainable ways to implement action research across an institution. Experts Anne Burns, Emily Edwards and Neville John Ellis close the book by presenting ideas for conducting teacher research through reflective practice, exploratory practice and action research.

Since its original landmark publication in 1980, A People's History of the United States has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, A People's History is the only volume to tell America's story from the point of view of -- and in the words of -- America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, A People's History of the United States, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new afterword by the author, this special twentieth anniversary edition continues Zinn's important contribution to a complete and balanced understanding of American history.

This latest volume lists all the major research projects being undertaken in Britain during the latter months of 1992, the whole of 1993 and the early months of 1995.

"Involving students in real historical problems that convey powerful lessons about U.S. history, these thought-provoking activities combine content with valuable practice in decision making, critical thinking, and understanding multiple perspectives. O'Reilly - an experienced, award-winning teacher - has students tackle fascinating historical questions that put students in the shoes of a range of people from the past: the rich and famous to ordinary citizens. Each lesson can be done either as an in-depth activity or as a "quick motivator." Detailed teacher plans, step-by-step instructions, list key vocabulary terms, offer troubleshooting tips, present ideas for post-activity discussions, and furnish related sources. Reproducible student handouts clearly lay out the decision-making scenarios, provide "outcomes," and present related source readings and/or images with analysis questions"--Page 4 of cover.
