

World History Survey Edition

This innovative survey of world history from earliest times to the present focuses on the role of four factors in the development of humankind: climate, communication and transportation technology, scientific advances, and the competence of political elites. Matossian moves chronologically through fifteen historic periods showing how one or more of the causative factors led to significant breakthroughs in human history. Shaping World History is based on original research and also draws widely from the literature on the history of science, technology, climate, agriculture, and historical epidemiology. This compelling analysis is presented in a personal style and includes reflections on how things work and why they are important. A leader in the field presents a cohesive narrative of world history that effectively addresses the main challenge of the introductory survey: how to navigate beginning students through the vast detail of the subject. McNeill uses connective webs that link trade, religious beliefs, technologies, pathogens, and much else traveled to organize details and keep the big picture in view. Students emerge with clear takeaways and a strong sense of the basic dynamics of world history. Together with digital resources that amplify the webs approach and highlight diverse types of evidence, John McNeill's *The Webs of Humankind* offers a clear and effective teaching tool for the world history survey course. Fisher explores the process of migration chronologically and at levels varying from the migration of an individual community, to larger patterns of the collective movements of major ethnic groups, to the more abstract study of emigration, migration, and immigration.

Civilization from its origins has depended on the food, fibre, and other commodities produced by farmers. In this unique exploration of the world history of agriculture, Mark B. Tauger looks at farmers, farming, and their relationships to non-farmers from the classical societies of the Mediterranean and China through to the twenty-first century.? Viewing farmers as the most important human interface between civilization and the natural world, Agriculture in World History examines the ways that urban societies have both exploited and supported farmers, and together have endured the environmental changes and crises that threatened food production.? Accessibly written and following a chronological structure, Agriculture in World History illuminates these topics through studies of farmers in numerous countries all over the world from Antiquity to the contemporary period. Key themes addressed include the impact of global warming, the role of political and social transformations, and the development of agricultural technology. In particular, the book highlights the complexities of recent decades: increased food production, declining numbers of farmers, and environmental, economic, and political challenges to increasing food production against the demands of a growing population. This wide-ranging survey will be an indispensable text for students of world history, and for anyone interested in the historical development of the present agricultural and food crises.?

World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers worldwide.

World History: Journeys from Past to Present uses common themes to present an integrated and comprehensive survey of human history from its origins to the present day. By weaving together thematic and regional perspectives in coherent chronological narratives, Coucher and Walton transform the overwhelming sweep of the human past into a truly global story that is relevant to the contemporary issues of our time. Revised and updated throughout, the second edition of this innovative textbook combines clear chronological progression with thematically focused chapters divided into six parts as follows: PART 1. EMERGENCE (Human origins to 500 CE) PART 2. ORDER (1 CE-1500 CE) PART 3. CONNECTIONS (500-1600 CE) PART 4. BRIDGING WORLDS (1300-1800 CE) PART 5. TRANSFORMING LIVES (1500-1900) PART 6. FORGING A GLOBAL COMMUNITY (1800- Present) The expanded new edition features an impressive full-color design with a host of illustrations, maps and primary source excerpts integrated throughout. Chapter opening timelines supply context for the material ahead, while end of chapter questions and annotated additional resources provide students with the tools for independent study. Each chapter and part boasts introductory and summary essays that guide the reader in comprehending the relevant theme. In addition, the companion website offers a range of resources including an interactive historical timeline, an indispensable study skills section for students, tips for teaching and learning thematically, and PowerPoint slides, lecture material and discussion questions in a password protected area for instructors. This textbook provides a basic introduction for all students of World History, incorporating thematic perspectives that encourage critical thinking, link to globally relevant contemporary issues, and stimulate further study.

In *Science in World History*, James Treffl presents a comprehensive, thematic survey of the history of science from its roots in different cultures around the world through to the present day. He explores crucial milestones in scientific development and at the same time examines the enormous social and intellectual changes they initiated. Opening with a discussion of the key elements of modern scientific enterprise, the book goes on to explore the earliest scientific activities, moving through Greece and Alexandria, science in the Muslim world, and then on to Isaac Newton, atomic theory and the major developments of the nineteenth century. After examining the most recent scientific activities across the world, the book concludes by identifying future directions for the field. Suitable for introductory courses and ideal for students new to the subject, this concise and lively study reconsiders the history of science from the perspective of world and comparative history.

World History, 4th edition, recounts the story of mankind from creation to the present. Students examine ancient civilizations through the Greeks to the Roman Empire. Then they survey India, Asia, and Africa on their way to the Middle Ages, the Renaissance, and the Reformation, upon which modern history is founded. They are challenged to discover the forces, issues, people, and movements that have shaped our modern world. God's providence and Bible integration are given prominence as the students are taught to view the world through a Christian lens. - Publisher.

Designed for use at the college level as a textbook for military history courses or supplemental reading for world history courses, this text offers an introduction and original synthesis of global military history. Each chapter traces key developments in military institutions and practices set in three crucial contexts: politics and institutions; social structures and economics, and cultures. Primary sources throughout the text give students a look at the writings historians use to draw conclusions, while Issue Boxes raise and explore historiographical controversies in military history. A two-volume format follows the usual division of world and western civilization courses and allows a standard semester split of military history survey courses. Volume One covers 2000 BC through 1500 AD. Volume Two covers the dawn of global warfare in 1500 through the present.

How can we understand the history of film? Historical facts don't answer the basic questions of film history. History, as this book shows, is more than the simple accumulation of film titles, facts and figures.

World History: Cultures, States, and Societies to 1500 offers a comprehensive introduction to the history of humankind from prehistory to 1500. Authored by six USG faculty members with advance degrees in History, this textbook offers up-to-date original scholarship. It covers such cultures, states, and societies as Ancient Mesopotamia, Ancient Israel, Dynastic Egypt, India's Classical Age, the Dynasties of China, Archaic Greece, the Roman Empire, Islam, Medieval Africa, the Americas, and the Khanates of Central Asia. It includes 350 high-quality images and maps, chronologies, and learning questions to help guide student learning. Its digital nature allows students to follow links to applicable sources and videos, expanding their educational experience beyond the textbook. It provides a new and free alternative to traditional textbooks, making World History an invaluable resource in our modern age of technology and advancement.

While world history materials date back to prehistoric times, the field itself is relatively young. Indeed, when the first edition of Peter Stearns's best-selling World History in Documents was published in 1998, world history was poised for explosive growth, with the College Board approving the AP world history curriculum in 2000, and the exam shortly thereafter. At the university level, survey world history courses are increasingly required for history majors, and graduate programs in world history are multiplying in the U.S. and overseas. World events have changed as rapidly as the field of world history itself, making the long-awaited second edition of World History in Documents especially timely. In addition to including a new preface, focusing on current trends in the field, Stearns has updated forty percent of the textbook, paying particular attention to global processes throughout history. The book also covers key events that have altered world history since the publication of the first edition, including terrorism, global consumerism, and environmental issues.

This generous abridgement of Stanley Lombardo's translation of the Odyssey offers more than half of the epic, including all of its best-known episodes and finest poetry, while providing concise summaries for omitted books and passages. Sheila Murnaghan's Introduction, a shortened version of her essay for the unabridged edition, is ideal for readers new to this remarkable tale of the homecoming of Odysseus.

In this concise, accessible introductory survey of the history of the United States from 1790 to the present day, Edward J. Davies examines key themes in the evolution of America from colonial rule to international supremacy. Focusing particularly on those currents within US history that have influenced the rest of the world, the book is neatly divided into three parts which examine the Atlantic world, 1700–1800, the US and the industrial world, and the emergence of America as a global power. The United States in World History explores such key issues as: the dynamics of the British Atlantic community the American revolution the impact of industrialization on the US the expansion of US consumer and cultural industries the Cold War, and its implications for the US. Part of our successful

Themes in World History series, The United States in World History presents a new way of examining the United States, and reveals how concepts that originated in America's definition of itself as a nation – concepts such as capitalism, republicanism and race – have had supranational impact across the world.

The second edition of this concise survey offers a comparative and comprehensive study of culinary cultures and food politics throughout the world, from ancient times to the present day. It examines the long history of globalization of foods as well as the political, social, and environmental implications of our changing relationship with food, showing how hunger and taste have been driving forces in human history. Including numerous case studies from diverse societies and periods, Food in World History explores such questions as: What social factors have historically influenced culinary globalization? How did early modern plantations establish patterns for modern industrial food production? Were eighteenth-century food riots comparable to contemporary social movements around food? Did Italian and Chinese migrant cooks sacrifice authenticity to gain social acceptance in the Americas? Have genetically modified foods fulfilled the promises made by proponents? This new edition includes expanded discussions of gender and the family, indigeneity, and the politics of food. Expanded chapters on contemporary food systems and culinary pluralism examine debates over the concentration of corporate control over seeds and marketing, authenticity and exoticism within the culinary tourism industry, and the impact of social media on restaurants and home cooks.

From the origins of drinking to the use and abuse of alcohol in the present day, this global historical study draws on approaches and research from biology, anthropology, sociology and psychology. Topics covered include: the impact of colonialism alcohol before the world economy industrialization and alcohol globalization, consumer society, and alcohol. Gina Hames argues that the production, trade, consumption, and regulation of alcohol have shaped virtually every civilization in numerous ways. It has perpetuated the development of both domestic and international trade; helped create identity and define religion; provided a tool for oppression as well as a tool for cultural and political resistance; and has supplied governments with essential revenues as well as a means of control over minority groups. Alcohol in World History is one of the first studies to pull together such a wide range of sources in order to compare the role of alcohol throughout time and across both western and non-western civilizations.
