Writing Scientific Research in Communication Sciences and Disorders is a comprehensive guide to the preparation and publication

of research papers for researchers in communication sciences and disorders. Individual chapters address the structure, content, and style of the introduction, method, results, and discussion sections of a research paper. The balance of the text examines the writing process, including the nuts and bolts of preparing tables and graphs, reviewing different voices and grammar issues, editing your own work, working with editors and peer reviewers, and getting started toward becoming a productive writer. Each topic is illustrated with informative examples, with clear, direct, and often humorous discussion of what makes the examples good or bad. Writing is essential in nearly every profession and particularly in communication sciences and disorders, where researchers must be able to express complex ideas to a variety of audiences--from colleagues to members of health care teams to clients and family members. Therefore, competency in written expression is required for certification and entry into clinical practice in communication sciences and disorders. Writing Scientific Research in Communication Sciences and Disorders will be a valuable supplementary text for undergraduate and graduate students in courses that include writing assignments and critical assessment of research literature, such as research methods and evidence-based clinical methods courses, as well as in thesis and dissertation preparation. Researchers looking for a guide to help improve their own writing will also find this text to be an invaluable resource that answers the big and little questions that arise in preparing manuscripts.

This is a comprehensive introduction to theoretical linguistics. It presupposes no previous knowledge and terms are defined as they are introduced; but it gives a rigorous and technical treatment of a wide range of topics, and brings the reader to an advanced level of understanding. Since its first publication in 1968 Introduction to Theoretical Linguistics has been one of the classic introductions to the discipline. In a field which is often seen as rapidly moving, it will continue to be used by students seeking an overview of the central areas of linguistics - phonetics and phonology, grammar and semantics - and to be of great value to anyone interested in the ways in which theory can help to explain the key problems of human language.

*What comes to mind when you think about lesson planning? If you're like most teachers, you focus on the material you need to present, what you will do and say, what you will ask students to do, and the assessments you will create and administer. And if you're like most teachers, you also know what it's like to be disappointed when this careful planning doesn't always lead to the deep understanding and mastery you'd intended. There's a better way to approach instructional design says author and teacher-educator Ann R. Reeves, and it's within every teacher's grasp. It begins with a simple mental shift from "planning for activities" to "planning for learning outcomes" and a critical concentration on learning objectives. Remarkable for its clarity and filled with vivid examples, Where Great Teaching Begins is a step-by-step walk through the crucial, behind-the-scenes intellectual work necessary to make instruction truly effective and help students learn deeply and meaningfully. Here, you'll discover how to * Translate even the most inscrutable standards into strong, learning-focused objectives. * Use effective objectives as the basis for excellent assessment. * Craft engaging learning activities that incorporate both targeted content and necessary thinking skills. * Pull objectives, assessments, and learning activities together into powerful plans for learning. Whether you're a novice instructional designer or a veteran seeking a new, streamlined process, this book is a must-read take on how to plan and achieve the excellent learning all teachers aim for and all students deserve.*

Scholars examining literature from former French colonies sometimes view it wrongly as simply an outgrowth of colonial literature. By ways to understand the multiple voices present, this book explores how Francophone African poetry and theatre in particular, since they constitute both an organic cultural product and a reflection of the diverse African cultures in which they originate. Themes explored include the many kinds of African identity formation, the resistance to former notions of literary composition as art, a remapping of social responsibility, and the impact of globalization on Francophone Africa's participation in world economics, politics and culture. This study examines the inner workings of Francophone African literature and suggests a canonization of modern Francophone works from a world perspective.

This book provides an introduction to poststructural and posthumanist theories in order to imagine new possibilities for expanding literacy education. The authors put to work these theories in the context of an elementary school classroom, examining literacy-based activities that occur as students participate with materials in a multimedia writers' studio. Focusing on literacy processes, the book emphasizes the fluid and sometimes unintentional ways multimodal artifacts come into being through intra-actions with human and nonhuman materials. Because these theories emphasize the unplanned, nonlinear aspects of literacy, the authors demonstrate an approach to literacy that works against the grain of standardization and rigid curricular models. Go Be a Writer! reveals that when educators appreciate the value of unscripted intra-actions they allow for more authentic learning.

A Hebrew and English Lexicon of the Old Testament, more commonly known as Brown–Driver–Briggs or BDB (from the name of its three authors) is a standard reference for Biblical Hebrew and Biblical Aramaic, first published in 1906. It was organized by (Hebrew) alphabetical order of three letter roots, but we put in Strong numbering order. The Brown-Driver-Briggs Hebrew and English Lexicon. Since it first appeared in the early part of the twentieth century, BDB has been considered the finest and most comprehensive Hebrew lexicon available to the English-speaking student. Based upon the classic work of Wilhelm Gesenius, the "father of modern Hebrew lexicography," BDB gives not only dictionary definitions for each word, but relates each word to its Old Testament usage and categorizes its nuances of meaning. BDB's exhaustive coverage of Old Testament Hebrew words, as well as its unparalleled usage of cognate languages and the wealth of background sources consulted and quoted, render BDB an invaluable resource for all students of the Bible.

Audio material to accompany the book is available at the following website:

*www.eupublishing.com/page/ArabicToday/audio*A student, business and professional course in spoken and written Arabic aimed at those with no prior knowledge of the language. Suitable for business professionals and students wanting to communicate directly with people and institutions in the Arab world, Arabic Today is a self-contained course in contemporary Arabic. Tuition tends to concentrate either on the written language (never used in everyday speech) or on a selected regional dialect (which is never written down). Arabic Today breaks with this tradition, capitalising on the emerging form of spoken Pan-Arabic. This supraregional form of educated speech is drawn from the most influential areas, as well as the modern written word. So whether you wish to speak the language or add writing skills as well, this course book and accompanying audio website are the ideal tools for self-tuition and classroom use. The second edition of this book has been thoroughly revised and updated to make it relevant to a new generation of readers. Grammar is explained more clearly and precisely, the reading material has been updated and the typography is clearer. New word indexes give meanings and reference for the vocabulary and together with the grammar index they offer an invaluable additional reference function.
