Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, Righteous Porkchop chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.

The solutions to each problem are written from a first principles approach, which would further augment the understanding of the important and recurring concepts in each chapter. Moreover, the solutions are written in a relatively self-contained manner, with very little knowledge of undergraduate mathematics assumed. In that regard, the solutions manual appeals to a wide range of readers, from secondary school and junior college students, undergraduates, to teachers and professors.
