Revised and updated with the latest scientific research and updated case studies, the business classic that offers a revealing look at psychopaths in the workplace—how to spot their destructive behavior and stop them from creating chaos in the modern corporate organization. Over the past decade, Snakes in Suits has become the definitive book on how to discover and defend yourself against psychopaths in the office. Now, Dr. Paul Babiak and Dr. Robert D. Hare return with a revised and updated edition of their essential guide. All of us at some point have—or will—come into contact with psychopathic individuals. The danger they present may not be readily apparent because of their ability to charm, deceive, and manipulate. Although not necessarily criminal, their self-serving nature frequently is destructive to the organizations that employ them. So how can we protect ourselves and our organizations in a business climate that offers the perfect conditions for psychopaths to thrive? In Snakes in Suits, Hare, an expert on the scientific study of psychopathy, and Babiak, an industrial and organizational psychologist and a leading authority on the corporate psychopath, examine the role of psychopaths in modern corporations and provide the tools employers can use to avoid and deal with them. Together, they have developed the B-Scan 360, a research tool designed specifically for business professionals. Dr. Babiak and Dr. Hare reveal the secret lives of psychopaths, explain the ways in which they manipulate and deceive, and help you to see through their games. The rapid pace of today’s corporate environment provides the perfect breeding ground for these “snakes in suits” and this newly revised and updated classic gives you the insight, information, and power to protect yourself and your company before it’s too late.

When Psychopaths Go to Work

Toward a Sociology of Algorithms

From the #1 New York Times–bestselling author of *The 48 Laws of Power* comes the definitive new book on decoding the behavior of the people around you Robert Greene is a master guide for millions of readers, distilling ancient wisdom and philosophy into essential texts for seekers of power, understanding and mastery. Now he turns to the most important subject of all - understanding people’s drives and motivations, even when they are unconscious of them themselves. We are social animals. Our very lives depend on our relationships with people. Knowing why people do what they do is the most important tool we can possess, without which our other talents can only take us so far. Drawing from the ideas and examples of Pericles, Queen Elizabeth I, Martin Luther King Jr, and many others, Greene teaches us how to detach ourselves from our own emotions and master self-control, how to develop the empathy that leads to insight, how to look behind people’s masks, and how to resist conformity to develop your singular sense of purpose. Whether at work, in relationships, or in shaping the world around you, *The Laws of Human Nature* offers brilliant tactics for success, self-improvement, and self-defense.

Explains the basic elements of poetry, and groups poems to encourage an analysis of similarities and differences

We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The ‘machine habitus’ is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life.

This book consists of the most representative poems of American poet Robert Frost.I'm going out to clean the pasture spring;I'll only stop to rake the leaves away(And wait to watch the water clear, I may): I shan't be gone long.-You come too.I'm going out to fetch the little calfThat's standing by the mother. It's so young, It totters when she licks it with her tongue.I shan't be gone long.-You come to

An acute and deeply insightful book of essays exploring poetic form and the role of instinct and imagination within form—from former poet laureate, Pulitzer Prize and National Book Award winning author Robert Hass. Robert Hass—former poet laureate, winner of the National Book Award, and recipient of the Pulitzer Prize—illuminates the formal impulses that underlie great poetry in this sophisticated, graceful, and accessible volume of essays drawn from a series of lectures he delivered at the renowned Iowa Writers’ Workshop. Form brilliantly synthesizes Hass’s formidable gifts as both a poet and a critic and reflects his profound education in the art of poetry. Starting with the exploration of a single line as the basic gesture of a poem, and moving into an examination of the essential gestures that exist inside forms, Hass goes beyond approaching form as a set of traditional rules that precede composition, and instead offers penetrating insight into the true openness and instinctiveness of formal creation. A Little Book on Form is a rous our longest lasting mode of literature from one of our greatest living poets.

No poet is more emblematically American than Robert Frost. Hailed as 'the most eminent, the most distinguished Anglo-American poet' by T.S. Eliot, he is the only writer in history to have been awarded four Pulitzer Prizes. In iconic poems like 'Stopping by Woods on a Snowy Evening', simple images summon the rural landscape of New England, and Frost unfailingly moves the reader with his profound grasp of the human condition. This is the most comprehensive and authoritative volume of Frost's verse available, comprising all eleven volumes of his poems, meticulously edited by Edward Connery Lathem.

rom one of the most brilliant and widely read of all American poets, a generous selection of lyrics, dramatic monologues, and narrative poems--all of them steeped in the wayward and isolated beauty of Frost's native New England. Includes his classics "Mending Wall," "Birches," and "The Road Not Taken," as well as poems less famous but equally great.

In the conclusion to the "Wheel of Time" series, all of humanity is in peril as Rand al'Thor moves forward to break the seals on the Dark One's prison and the Last Battle will determine the fate of the world.

THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power.

_____ (From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, *Volumentary* Three, was wack. People set higher standards for me, and I love it.

Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. *The Art of Seduction* is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. From the internationally bestselling author of *The 48 Laws of Power*, *Mastery*, and *The 33 Strategies Of War*.

Robert Frost observed in his wife, Elinor, a desire to live "a life that goes rather poetically." The same could be said of many members of the Frost family, over several generations. In *You Come Too*, Frost’s granddaughter, Lesley Lee Francis, combines priceless personal memories and rigorous research to create a portrait of Frost and the women, including herself, whose lives he touched. Francis provides a vivid picture of Frost the family man, revealing him to be intensely engaged rather than the aloof artist that is commonly portrayed. She shares with us the devastation Frost and Elinor experienced when faced with tragic illnesses, both physical and mental, and the untimely death of family members. Elinor’s own death added to the poet’s despair and unleashed complex feelings throughout the family. (Francis’s mother would lament the toll taken on Elinor by what she perceived as Frost’s “selfishness” in the life he had chosen.) This is also the story of Lesley Frost, Francis’s remarkable mother, who struggled to emerge from her celebrated father’s shadow, while, as one of the people closest to him, sharing his intuitive impulse to write and to indulge their mutual love of books and poetry. Francis would herself become yet another writer and, like her grandfather and mother before her, a teacher—despite sharing Frost’s sense of being “imperfectly academic.” In addition, Francis explores Frost’s professional relationships with women outside the family, such as the poets Harriet Monroe, Amy Lowell, and Susan Hayes Ward. Francis’s invaluable insights into Frost’s poetry and her inclusion of previously unpublished family writings and photographs make this book essential to Frost scholarship. But *You Come Too* will appeal to anyone interested in this great poet’s life and work. It also reveals unforgettable stories of strong, independent women and their passion to create and share poetry.

Love You Forever

A Boy's Will

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop’s administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country’s seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube’s forces in the State of New Jersey. The Cuban and Hawaian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

North of Boston (1914) is a collection of poems by American poet Robert Frost. Following the success of Frost’s debut, *A Boy’s Will* (1913), *North of Boston* was published in London to enthusiastic reviews from both Ezra Pound and W.B. Yeats. His success abroad quickly translated to critical acclaim in the United States, and Frost would eventually be recognized as a leading American poet. “Mending Wall” takes place in spring, as the people emerge from their homes to assess the damage done by the long, dark winter. Observing that parts of the stone wall on the edge of his property have fallen, the poet joins his neighbor “to walk the line / And set the wall between us once again.” Although he feels they “do not need the wall,” his neighbor insists that “‘‘Good fences make good neighbours,’’” continuing down the line to reinforce the space between them. A meditation on humanity, civilization, and democracy, “Mending Wall” is an iconic and frequently anthologized poem. In “After Apple-Picking,” as fall gives over to winter, the poet remembers in dreams how the “Magnified apples appear and disappear, / Stem end and blossom end” as he climbs the ladder into the heart of the tree. Both a symbol for life and a metaphor for the poetic act, apple picking leaves the poet “overtired / Of the great harvest [he himself] desired”, awaiting sleep as he describes “its coming on,” wondering what, if anything, it will bring. With a beautifully designed cover and professionally typeset manuscript, this edition of Robert Frost’s *North of Boston* is a classic of
