With groundbreaking research on women's leadership, Dr. Candace Steele Flippin's guidebook empowers women to challenge the glass ceiling system within their own minds (Tyree C. Daniels, executive chairman at Memphis College Preparatory). Drawing from his own experience with corporations both large and small and as a business owner, Jack Molisani has seen every mistake the professional (or not-so-professional) can make in today's highly competitive job market. This book provides the tools for navigating these choppy waters. Starting with how to escape a dead-end job or an overbearing boss, to advancing one's career, and finally to achieving a higher standard of living, the book is divided into sections on finding new directions, making things happen, and optimizing the results. While most business guides focus on either job hunting for the unemployed or getting rich for business owners and CEOs, these solutions—including how to get and ace an interview and how to increase job security once hired—cater to real people wanting real advice on how to escape the chains of a recessive economy and create a long-term

*The Practical Guide to Building a Career in the Digital Age If Marc Miller could have seen the future when he wrote his first book: Repurpose Your Career, A Practical Guide for Baby Boomers, he might have called it Life As You Know It Is About to Change...A Lot. Since the 2008 economic downtown left many Baby Boomers unable to retire, Marc decided to use his own experiences to help others pivot to a career that would fulfill them for the next 20 years. In his second book, Repurpose Your Career: A Practical Guide for the Second Half of Life he addressed the fact that the people seeking him out weren't all Baby Boomers. *dissatisfied with their careers or were being displaced by ongoing technological and social disruption. Repurpose Your Career third edition responds to another huge shift in work: In this age of disruption, digitization, and the gig economy, people need a new mindset and strategies to become continual learners, create their own flexible careers, and cope with ageism. This book helps them do it. Miller's Career Pivot.com has been listed as a top career site by organizations including Forbes and Career Sherpa, and his strategies for a career transition have been featured on Mashable, Life Hacker, Money, Flexjobs and Sixty & Me. His second book was listed as one of the best career books of all time by Book Authority. A "recovering engineer," who spent years working at IBM, Miller's own career journey started when his bicycle collided with a car, nearly ending his life. The experience changed his perspective on what he was doing with his time and launched him on a search for career fulfillment, leading him to jobs including teaching in the inner city, fundraising for a non-profit, and working for startups. He decided to parlay his experiences-and his engineer's expertise at breaking big tasks into manageable steps-into helping others find long-lasting career fulfillment. Today, though unemployment is at record lows for all age groups, employee satisfaction numbers have remained low. Everyone wants a job that's meaningful and fulfilling to them as individuals, but few know how to evaluate an opportunity for those criteria. Instead, they focus on things like money and location, not realizing that more impactful factors to their happiness might include how much time they interact with others, whether the role requires multitasking or single focus,*

*and what level of emotional support they need. Complicating matters is the fact that entire industries can virtually disappear overnight and that many people will wind up doing a series of jobs and side gigs rather than having one long-term role with a single employer. Every worker--regardless of age--needs to avail themselves of every opportunity to learn and grow rather than expecting someone to train them. And they to look not for a role to fill but a problem to solve. Written with professional writer Susan Lahey, Repurpose Your Career, the third edition is not only an easy read but packed with practical information and specific action steps. perpetuates inequality by class, gender, and race; and it suggests how we can reconfigure our relationships to paid work. "Follow your passion" is a popular mantra for career decision-making in the United States. Passion-seeking seems like a promising path for avoiding the potential drudgery of a life of paid work, but this "passion principle"—seductive as it is—does not universally translate. *The Trouble with Passion* reveals the significant downside of the passion principle: the concept helps culturally legitimize and reproduce an exploited, overworked white-collar labor force and broadly serves to reinforce class, race, and gender segregation and inequality. Grounding her investigation in the paradoxical tensions between capitalism's demand for ideal workers and our cultural expectations for self-expression, sociologist Erin A. Cech draws on interviews that follow students from college into the workforce, surveys of US workers, and experimental data to explain why the passion principle is such an attractive, if deceptive, career decision-making mantra, particularly for the college educated. Passion-seeking presumes middle-class safety nets and springboards and penalizes first-generation and working-class young adults who seek passion without them. The ripple effects of this mantra undermine the promise of college as a tool for social and economic mobility. The passion principle also feeds into a culture of overwork, encouraging white-collar workers to tolerate precarious

employment and gladly sacrifice time, money, and leisure for work they are passionate about. And potential employers covet, but won't compensate, passion among job applicants. This book asks, What does it take to center passion in career decisions? Who gets ahead and who gets left behind by passion-seeking? The Trouble with Passion calls for citizens, educators, college administrators, and industry leaders to reconsider how we think about good jobs and, by extension, good lives.
